

SPIRAL GALAXY LETTER PUZZLE

Subdivide the grid into pieces such that each piece is centered on a star and rotationally symmetric. Regions with black stars are colored black. This puzzle has multiple solutions. For example, to the right are two different valid solutions.

Question 1. Can you find a solution in which the black shape looks like the letter R?

Question 2. Which other letters can be formed as solutions of this puzzle?

Question 3. Can you make a puzzle with more letter solutions? Let us know!
