Integrating Weather Prediction Model into ATM planning (SESAR Engage project)

Capacity Modeling for Controller Workload Evaluation at RTC Arlanda

Predecessor:

KODIC - Kompetens, kapacitet och optimering i digital flygledningscentral

SWEAO: Enroute

CybSec

SAILAS:
airports

UTMOK, PBN4UTM

CAPMOD Remote Ops

IWA (weather)

IFWHEN
validation

TMAKPI

ODESTA
optimization

How to design an optimal airspace?

Optimal Choice of Subsidized Routes in Air Transportation

Adaptive layered structure design, risk-based routing, emergency landing (location of zones) and safe routes, strategic deconfliction market

How much UTM traffic is OK, before: safety compromised, too much noise, communication jammed, long delays...
Under various assumptions: CD&R capabilities, operation paradigms. Focus: very low level, uncontrolled airspace

Security and Privacy of Air Traffic Communication

Great minds think alike

- KPIs (LFV, SESAR) "If you can't measure it you can't improve it"
- TMA enroute (LFV, SESAR, TS, LiU) [ODESTA](#) in [INFORMS OR/MS Today SI](#)
- Routes sectors (Swedavia, ODESTA, SESAR, TS)
- Weather, fleet (TS, SESAR)

ODESTA (Optimizing Aircraft Descent for Environmentally Sustainable Aviation) '20-23
KTH CSA

[idea: LiU (opt)]

+z (CDO, fuel/noise), weather, tradeoffs; fwd-looking

TMA KPI (Towards Multidimensional Adaptive KPIs)
'19-22 TrV [idea: LFV (performance)]

Baseline KPI development:

- to drive the design in ODESTA (optimization algorithms)
- to assess solution quality in IFWHEN (validation framework)

IWA (Impact of Weather on ATM) '19-21 SESAR

ODESTA2d (Optimal Design of Terminal Airspace) '15-18 VINNOVA + LFV (in-kind)
2d, integrated strategic design, noise, weather, fleet mix (1-size-fits-all)

IFWHEN (Impact of Fleet Diversity and Weather Hazards on Emissions, Noise and Predictability): '19-21, TS
[idea: TS (what was going on)]
vertical (in)efficiency, per-flight view, noise/fuel/punctuality tradeoffs, weather, airspace users diversity; historical

Research directions

- Multi-aviation airspace: Capacity estimation and route planning for various kinds of air traffic:
 - unmanned aerial vehicles (UAV) traffic management (UTM)
 - urban air mobility (UAM)
 - conventional air traffic management (ATM)
 - space2ground missions
- Airspace design for mixture of users
- Performance-based services (PBS)
- Development and optimization of environmental and other KPIs
- Lowering environmental impact of aviation (low-noise PBN routes) in terminal maneuvering areas (TMAs)
- Economic mechanisms and game-theoretic concepts for strategic traffic deconfliction.
- Controllers workload and scheduling for multiple Remote Tower Operations
- Risk assessment, safety and efficiency of flight paths
- Facility location for UTM and ATM – airports, vertiports, takeoff and landing areas (TOLAs), launchpads

Keywords

- Unmanned air traffic management (UTM)
- Conventional air traffic management (ATM)
- Algorithms, optimization, modeling, simulation
- Decision support tools for UTM and ATM

INBJUDAN ÖPPEN DAG • 19 november 2019

AUTOMATIONS DAG FLYG LFV & LIU

Automation, luftrum, flygtrafikledning och människan i fokus

Välkommen till Automationsdagen där vi har fokus på flygtrafikledning, särskilt vad gäller säkerhet och prestanda med människan i fokus. Här möter du forskare i en personlig, interaktiv miljö som visar upp resultat och lösningar inom flera olika områden. Du får möjlighet att diskutera, ställa frågor och själv prova flera av tillämpningarna. Det är en öppen dag så du väljer själv hur länge du vill delta.

Automationen tar små och stora steg – allt för säkerhet, effektivitet och hållbarhet. Inom flyg och flygtrafikledning är utmaningarna både spetsiga och breda. Drönare, AI, ny teknik tillsammans med hög datorkraft görs nu tillgängligt för konsumenter. Frågan är – hur det kommer flygbranschen tillgodo?

Automationsdagen är både en delrapportering av Automationsprogrammet 1 (2015–2019) och input till framtidens Automationsprogram. Trafikverket är sponsor för Automationsprogrammet och har flera forskningsprojekt inom framtidens flygtrafikledning i sin portfölj. Resultat och rapporter finns tillgängliga på www.trafikverket.se.

LFV Air Navigation Services of Sweden och Linköpings Universitet (LiU) samarbete har gett fantastiska resultat och mer ska det bli. Avsikten är att ha 15–20 forskare och representanter från KTS, MIT och IDA för att träffa just dig.

Varmt välkommen hälsar LFV, LiU och Trafikverket med partners!

Björn Wahlström, Chef Forskning & Innovation, LFV
Billy Josefsson, Manager Automation & Mänsklig prestanda, LFV
Martin Rantzer, Prefekt, Linköpings Universitet (LiU)
Marie Fridolin, Verksamhetsstyrningschef Strategisk utveckling, Trafikverket

• TID OCH PLATS

Tisdag 19 november 2019

klockan 09.30
