

Biträdande professor at LiU–How Did I End up Here?

Christiane Schmidt

June 12, 2024

Technische
Universität
Braunschweig

(10/2000-02/2006: Studied Mathematics in Finance and Industry, major in mathematical optimization)

05/2006-09/2007 Institute of **Mathematical Optimization**

10/2007-05/2013+12/2013-08/2014 **Algorithms Group** (first research assistant then lecturer and research assistant)

2011: Dr. rer. nat. (Algorithms for Mobile Agents with Limited Capabilities)

Stony Brook **University**

06/2013-11/2013 Department of **Applied Math and Statistics**

האוניברסיטה העברית בירושלים
THE HEBREW UNIVERSITY OF JERUSALEM

09/2014-08/2015 The Rachel and Selim Benin School of **Computer Science and Engineering**, **Israeli Center for Research Excellence in Algorithms (I-CORE Algo)**

li.u LINKÖPING
UNIVERSITY

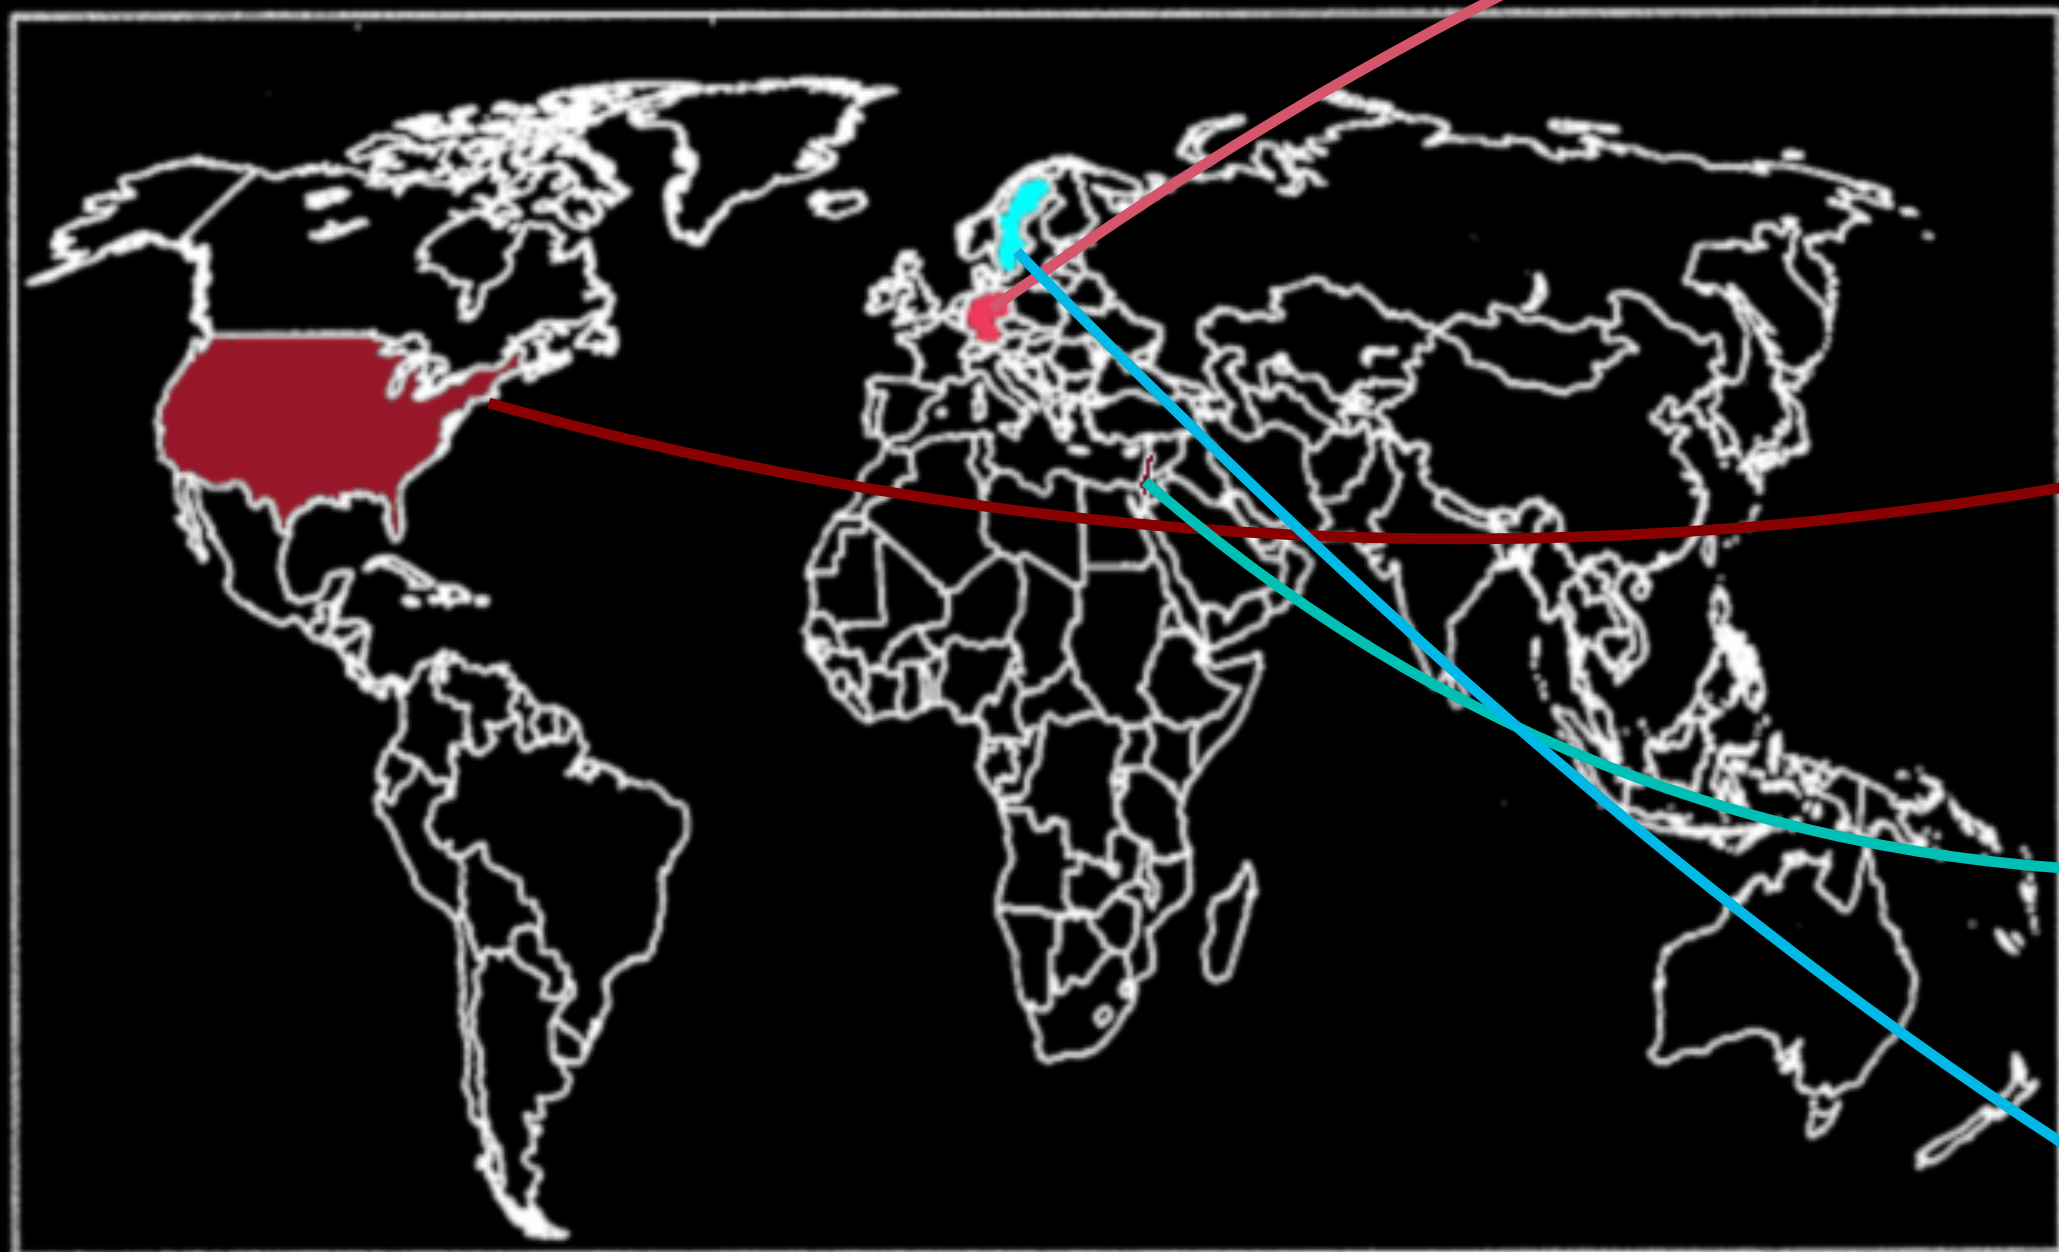

09/2015 **Communications and Transport Systems @ ITN:**

09/2015-10/2017: Postdoc

11/2017-03/2020: Assistant professor (biträdande universitetslektor)

04/2020-02/2022: Associate professor (universitetslektor)

03/2022-...: Senior associate professor (biträdande professor)

<https://www.itn.liu.se/~chrsc91/>

Technische
Universität

05/2006-09/2007 Institute of **Mathematical Optimization**

10/2007-05/2013+12/2013-08/2014 **Algorithms Group** (first research assistant then lecturer and research assistant)

2011: Dr. rer. nat. (Algorithms for Mobile Agents with Limited Capabilities)

Technische
Universität
Braunschweig

(10/2000-02/2006: Studied Mathematics in Finance and Industry, major in mathematical optimization)

05/2006-09/2007 Institute of **Mathematical Optimization**

10/2007-05/2013+12/2013-08/2014 **Algorithms Group** (first research assistant then lecturer and research assistant)

2011: Dr. rer. nat. (Algorithms for Mobile Agents with Limited Capabilities)

- Had written my diploma thesis (I'm that old that we did not yet have the Bachelor/Master system in Germany, it's a Master's equivalent) with my PhD advisor, Sándor Fekete, already on a watchman-route problem ("Polygon Exploration with Scan Cost"), that is, in Computational Geometry (CG).

Technische
Universität
Braunschweig

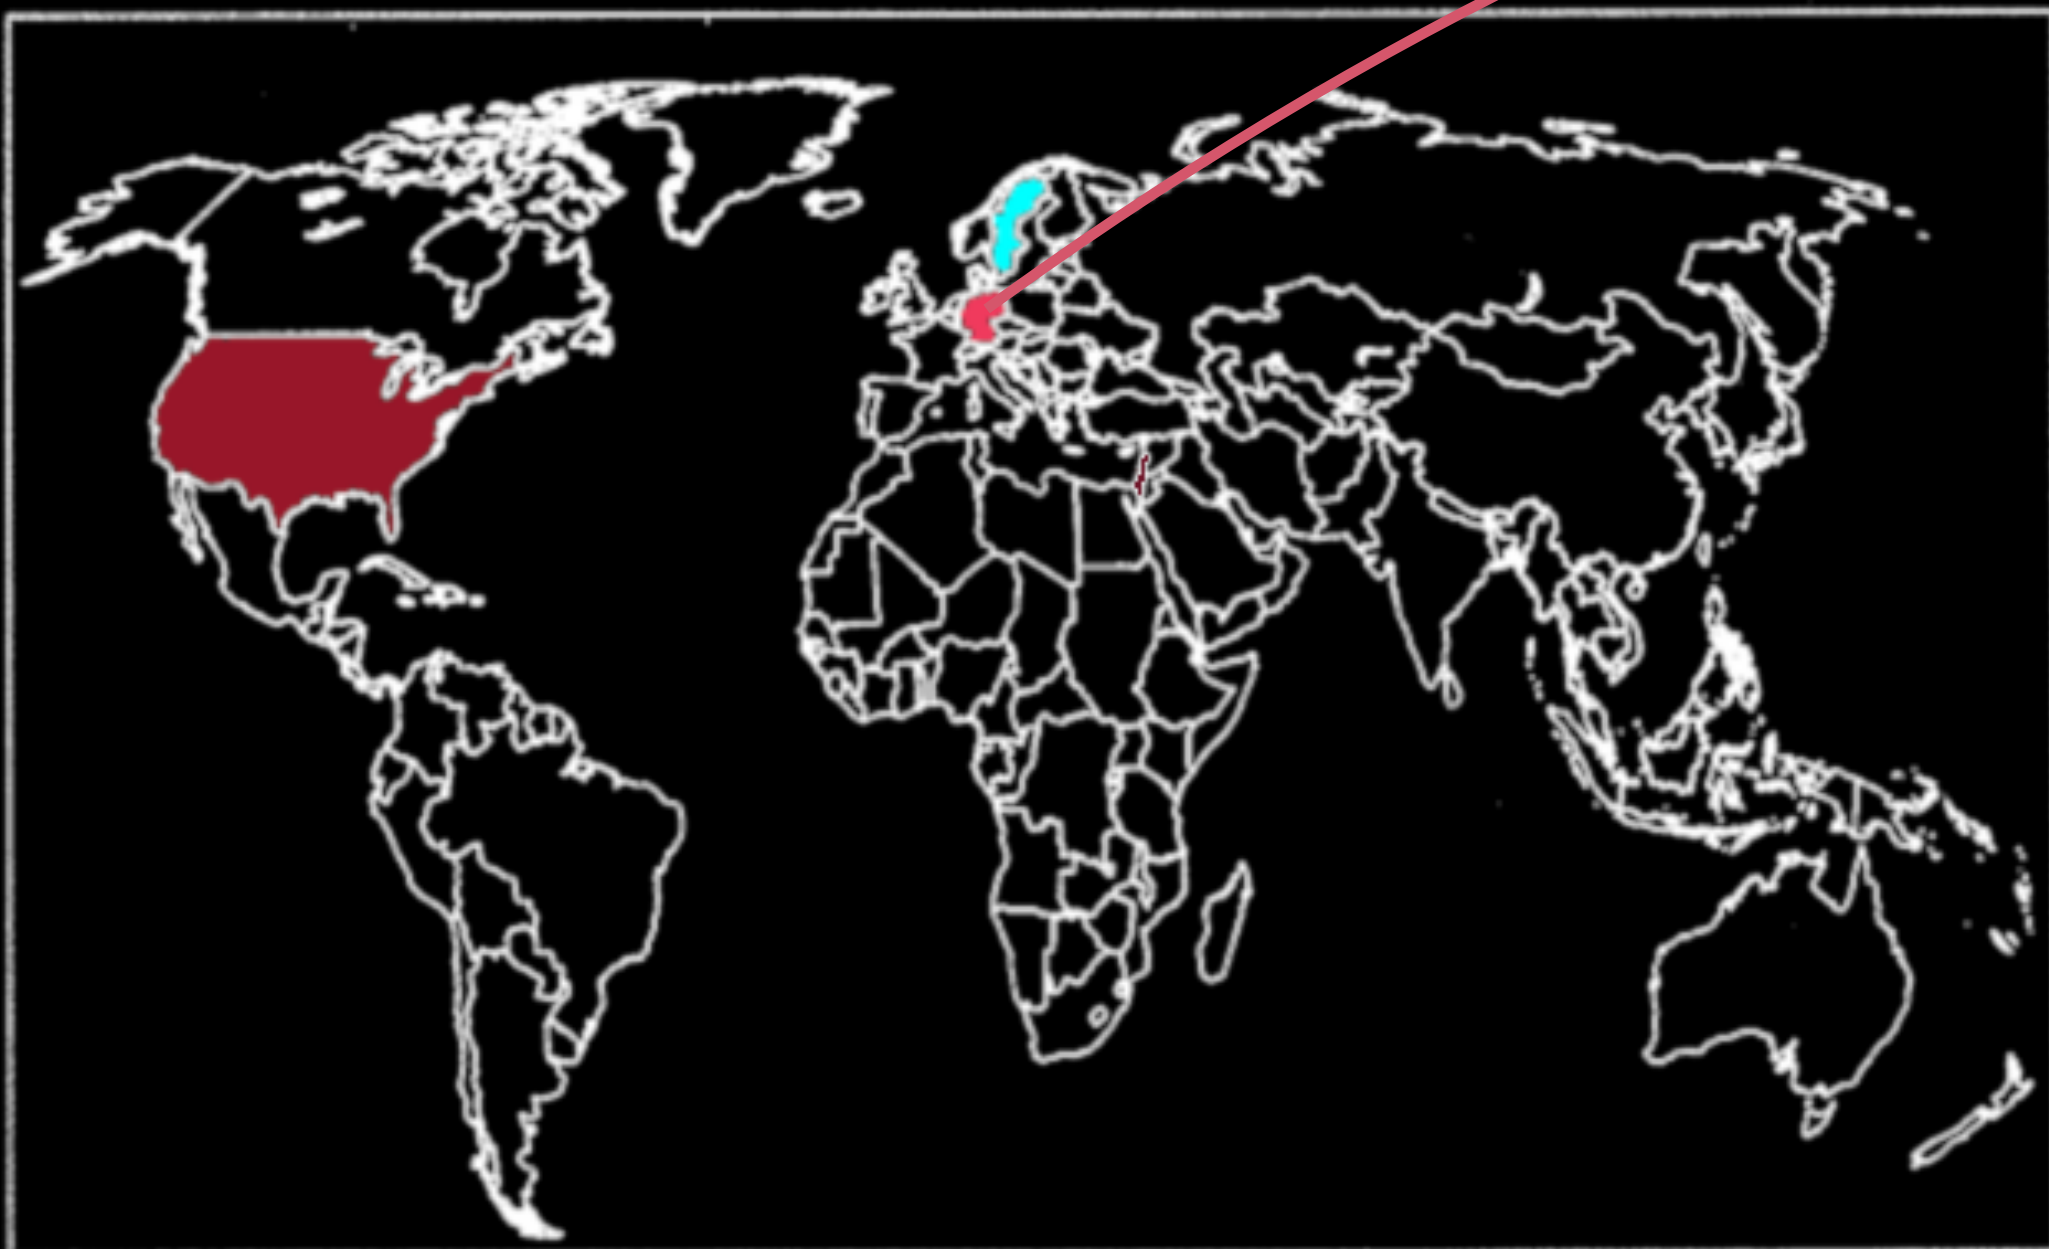

(10/2000-02/2006: Studied Mathematics in Finance and Industry, major in mathematical optimization)

05/2006-09/2007 Institute of **Mathematical Optimization**

10/2007-05/2013+12/2013-08/2014 **Algorithms Group** (first research assistant then lecturer and research assistant)

2011: Dr. rer. nat. (Algorithms for Mobile Agents with Limited Capabilities)

- Had written my diploma thesis (I'm that old that we did not yet have the Bachelor/Master system in Germany, it's a Master's equivalent) with my PhD advisor, Sándor Fekete, already on a watchman-route problem ("Polygon Exploration with Scan Cost"), that is, in Computational Geometry (CG).
- Really loved the type of problems.

2011: Dr. rer. nat. (Algorithms for Mobile Agents with Limited Capabilities)

- Had written my diploma thesis (I'm that old that we did not yet have the Bachelor/Master system in Germany, it's a Master's equivalent) with my PhD advisor, Sándor Fekete, already on a watchman-route problem ("Polygon Exploration with Scan Cost"), that is, in Computational Geometry (CG).
- Really loved the type of problems.
- Many publications not in thesis
- In Germany: no PhD courses, but quite a lot of teaching, e.g., I was assistant lecturer in an algorithms and data structures course with 200-300 students

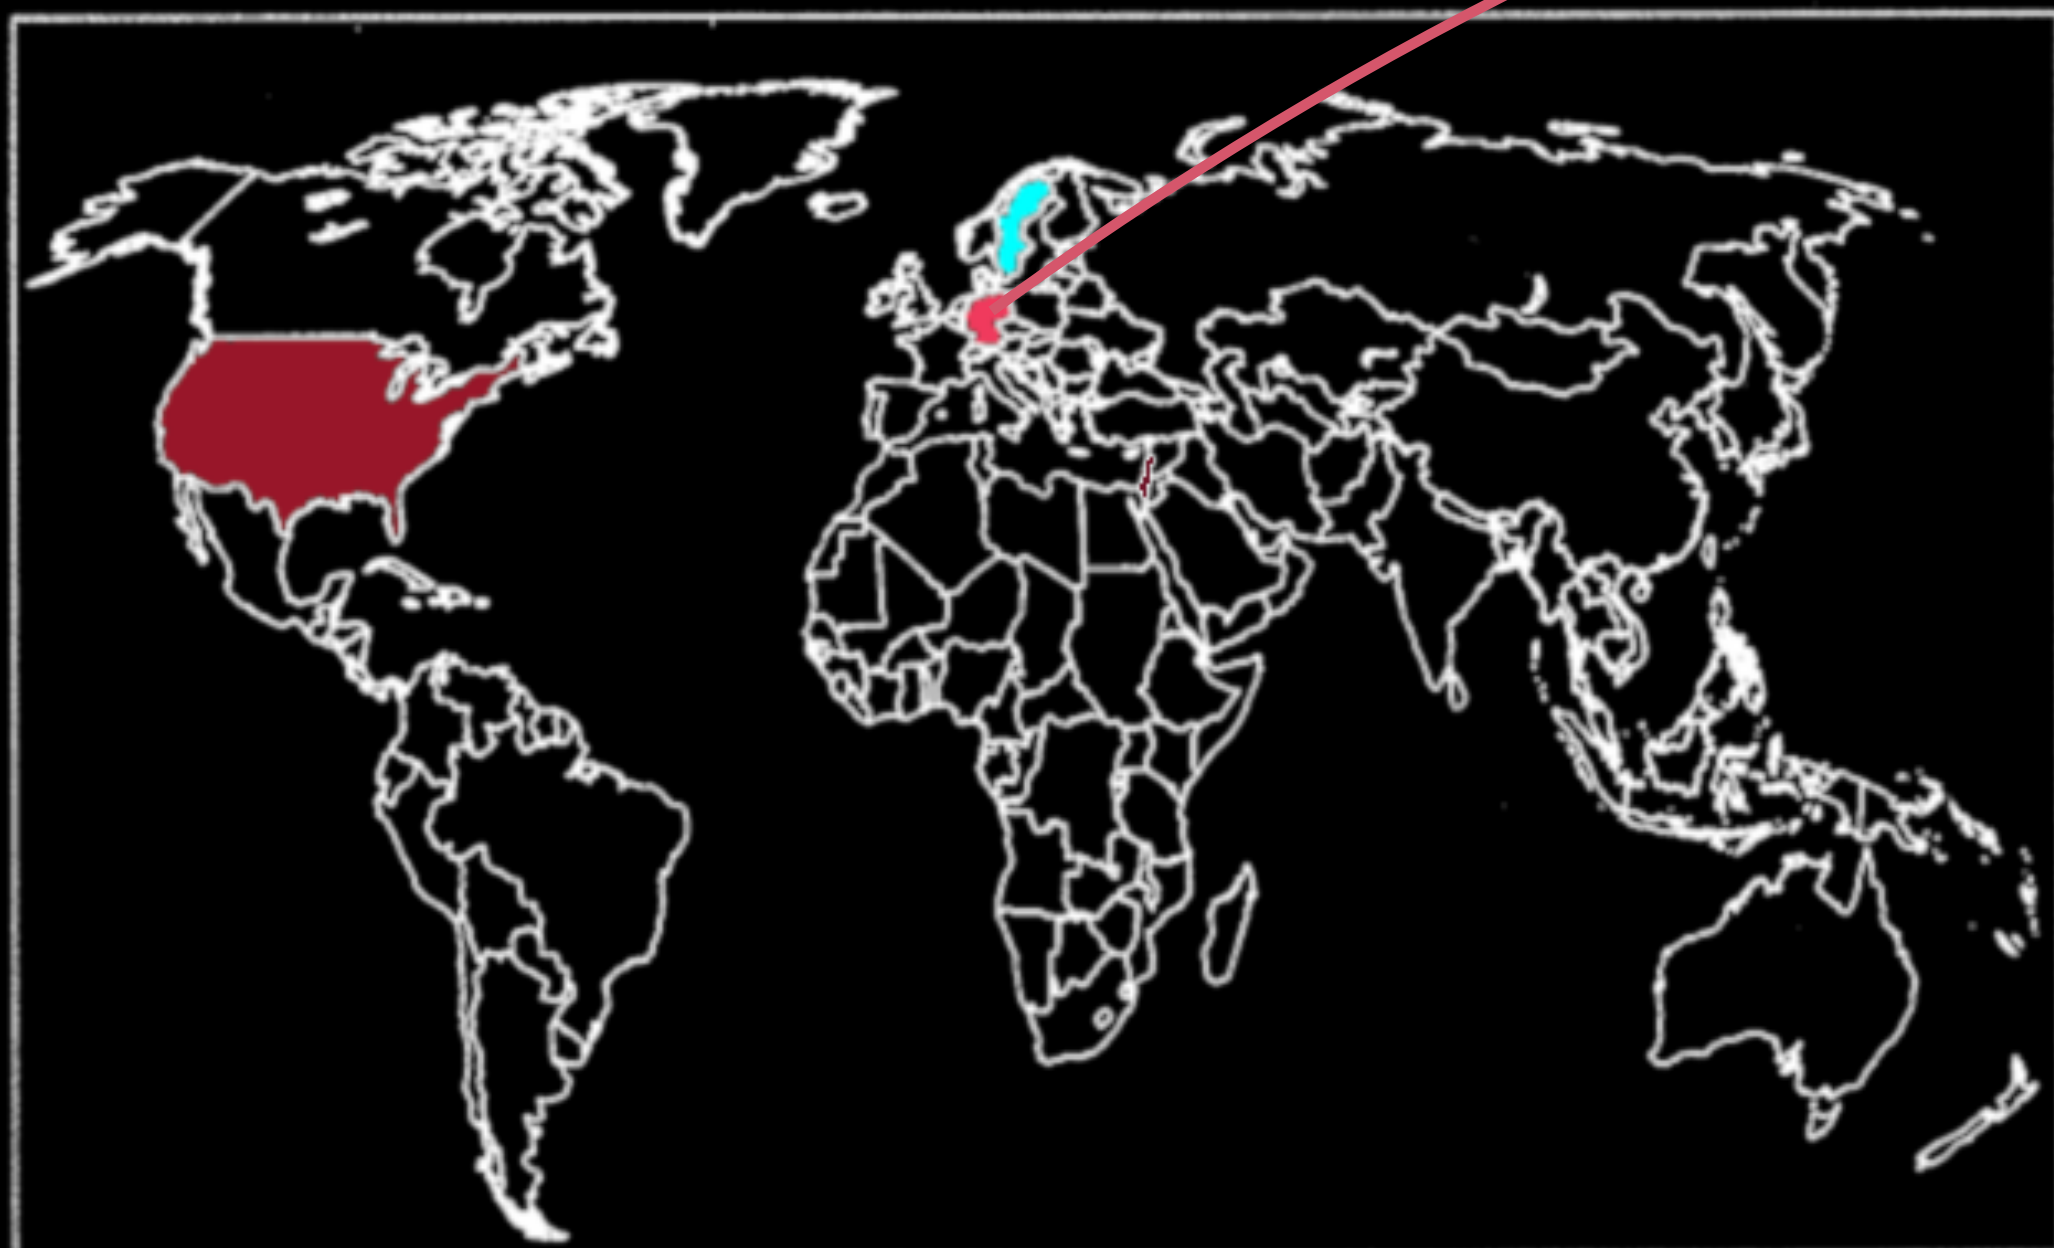

(10/2000-02/2006: Studied Mathematics in Finance and Industry, major in mathematical optimization)

05/2006-09/2007 Institute of **Mathematical Optimization**

10/2007-05/2013+12/2013-08/2014 **Algorithms Group** (first research assistant then lecturer and research assistant)

2011: Dr. rer. nat. (Algorithms for Mobile Agents with Limited Capabilities)

- Had written my diploma thesis (I'm that old that we did not yet have the Bachelor/Master system in Germany, it's a Master's equivalent) with my PhD advisor, Sándor Fekete, already on a watchman-route problem ("Polygon Exploration with Scan Cost"), that is, in Computational Geometry (CG).
- Really loved the type of problems.
- Many publications not in thesis
- In Germany: no PhD courses, but quite a lot of teaching, e.g., I was assistant lecturer in an algorithms and data structures course with 200-300 students
- My supervisor is well known in CG, and we went to EuroCG and larger conferences, so, good to build a network

(10/2000-02/2006: Studied Mathematics in Finance and Industry, major in mathematical optimization)

05/2006-09/2007 Institute of **Mathematical Optimization**

10/2007-05/2013+12/2013-08/2014 **Algorithms Group** (first research assistant then lecturer and research assistant)

2011: Dr. rer. nat. (Algorithms for Mobile Agents with Limited Capabilities)

- Had written my diploma thesis (I'm that old that we did not yet have the Bachelor/Master system in Germany, it's a Master's equivalent) with my PhD advisor, Sándor Fekete, already on a watchman-route problem ("Polygon Exploration with Scan Cost"), that is, in Computational Geometry (CG).
- Really loved the type of problems.
- Many publications not in thesis
- In Germany: no PhD courses, but quite a lot of teaching, e.g., I was assistant lecturer in an algorithms and data structures course with 200-300 students
- My supervisor is well known in CG, and we went to EuroCG and larger conferences, so, good to build a network
- My supervisor insisted on writing introductions etc., so, there was a steep learning curve afterwards to get to writing research proposals

06/2013-11/2013 Department of Applied Math and Statistics

- Hosted by Prof. Joseph S.B. Mitchell, SUNY Distinguished Professor, one of the foremost researchers in Computational Geometry, Gödel Prize recipient (2010) and his wife Estie Arkin, both professors in applied math and statistics

06/2013-11/2013 Department of Applied Math and Statistics

- Hosted by Prof. Joseph S.B. Mitchell, SUNY Distinguished Professor, one of the foremost researchers in Computational Geometry, Gödel Prize recipient (2010) and his wife Estie Arkin, both professors in applied math and statistics
- Many other great researchers

06/2013-11/2013 Department of Applied Math and Statistics

- Hosted by Prof. Joseph S.B. Mitchell, SUNY Distinguished Professor, one of the foremost researchers in Computational Geometry, Gödel Prize recipient (2010) and his wife Estie Arkin, both professors in applied math and statistics
- Many other great researchers
- Had worked with Joe briefly during my PhD

06/2013-11/2013 Department of Applied Math and Statistics

- Hosted by Prof. Joseph S.B. Mitchell, SUNY Distinguished Professor, one of the foremost researchers in Computational Geometry, Gödel Prize recipient (2010) and his wife Estie Arkin, both professors in applied math and statistics
- Many other great researchers
- Had worked with Joe briefly during my PhD
- Obtained funding from the German Academic Exchange Service (DAAD)*

06/2013-11/2013 Department of Applied Math and Statistics

- Hosted by Prof. Joseph S.B. Mitchell, SUNY Distinguished Professor, one of the foremost researchers in Computational Geometry, Gödel Prize recipient (2010) and his wife Estie Arkin, both professors in applied math and statistics
- Many other great researchers
- Had worked with Joe briefly during my PhD
- Obtained funding from the German Academic Exchange Service (DAAD)*

*Comparable to VR's International Postdoc grant (<https://www.vr.se/english/applying-for-funding/calls/2023-11-15-international-postdoc-within-natural-and-engineering-sciences-autumn-call.html>) "The purpose of the grant is to give newly qualified researchers with a doctoral degree from a Swedish university the opportunity to expand their networks and their competences by working abroad under secure employment conditions."

- Hosted by Prof. Joseph S.B. Mitchell, SUNY Distinguished Professor, one of the foremost researchers in Computational Geometry, Gödel Prize recipient (2010) and his wife Estie Arkin, both professors in applied math and statistics
- Many other great researchers
- Had worked with Joe briefly during my PhD
- Obtained funding from the German Academic Exchange Service (DAAD)*
- Joe creates a great collaborative working environment (CG group, now also running online)

*Comparable to VR's International Postdoc grant (<https://www.vr.se/english/applying-for-funding/calls/2023-11-15-international-postdoc-within-natural-and-engineering-sciences-autumn-call.html>) "The purpose of the grant is to give newly qualified researchers with a doctoral degree from a Swedish university the opportunity to expand their networks and their competences by working abroad under secure employment conditions."

- Many other great researchers
- Had worked with Joe briefly during my PhD
- Obtained funding from the German Academic Exchange Service (DAAD)*
- Joe creates a great collaborative working environment (CG group, now also running online)
- Lived in NYC
- Stay helped to get to know US Computational Geometers better (good to not only have a European network)

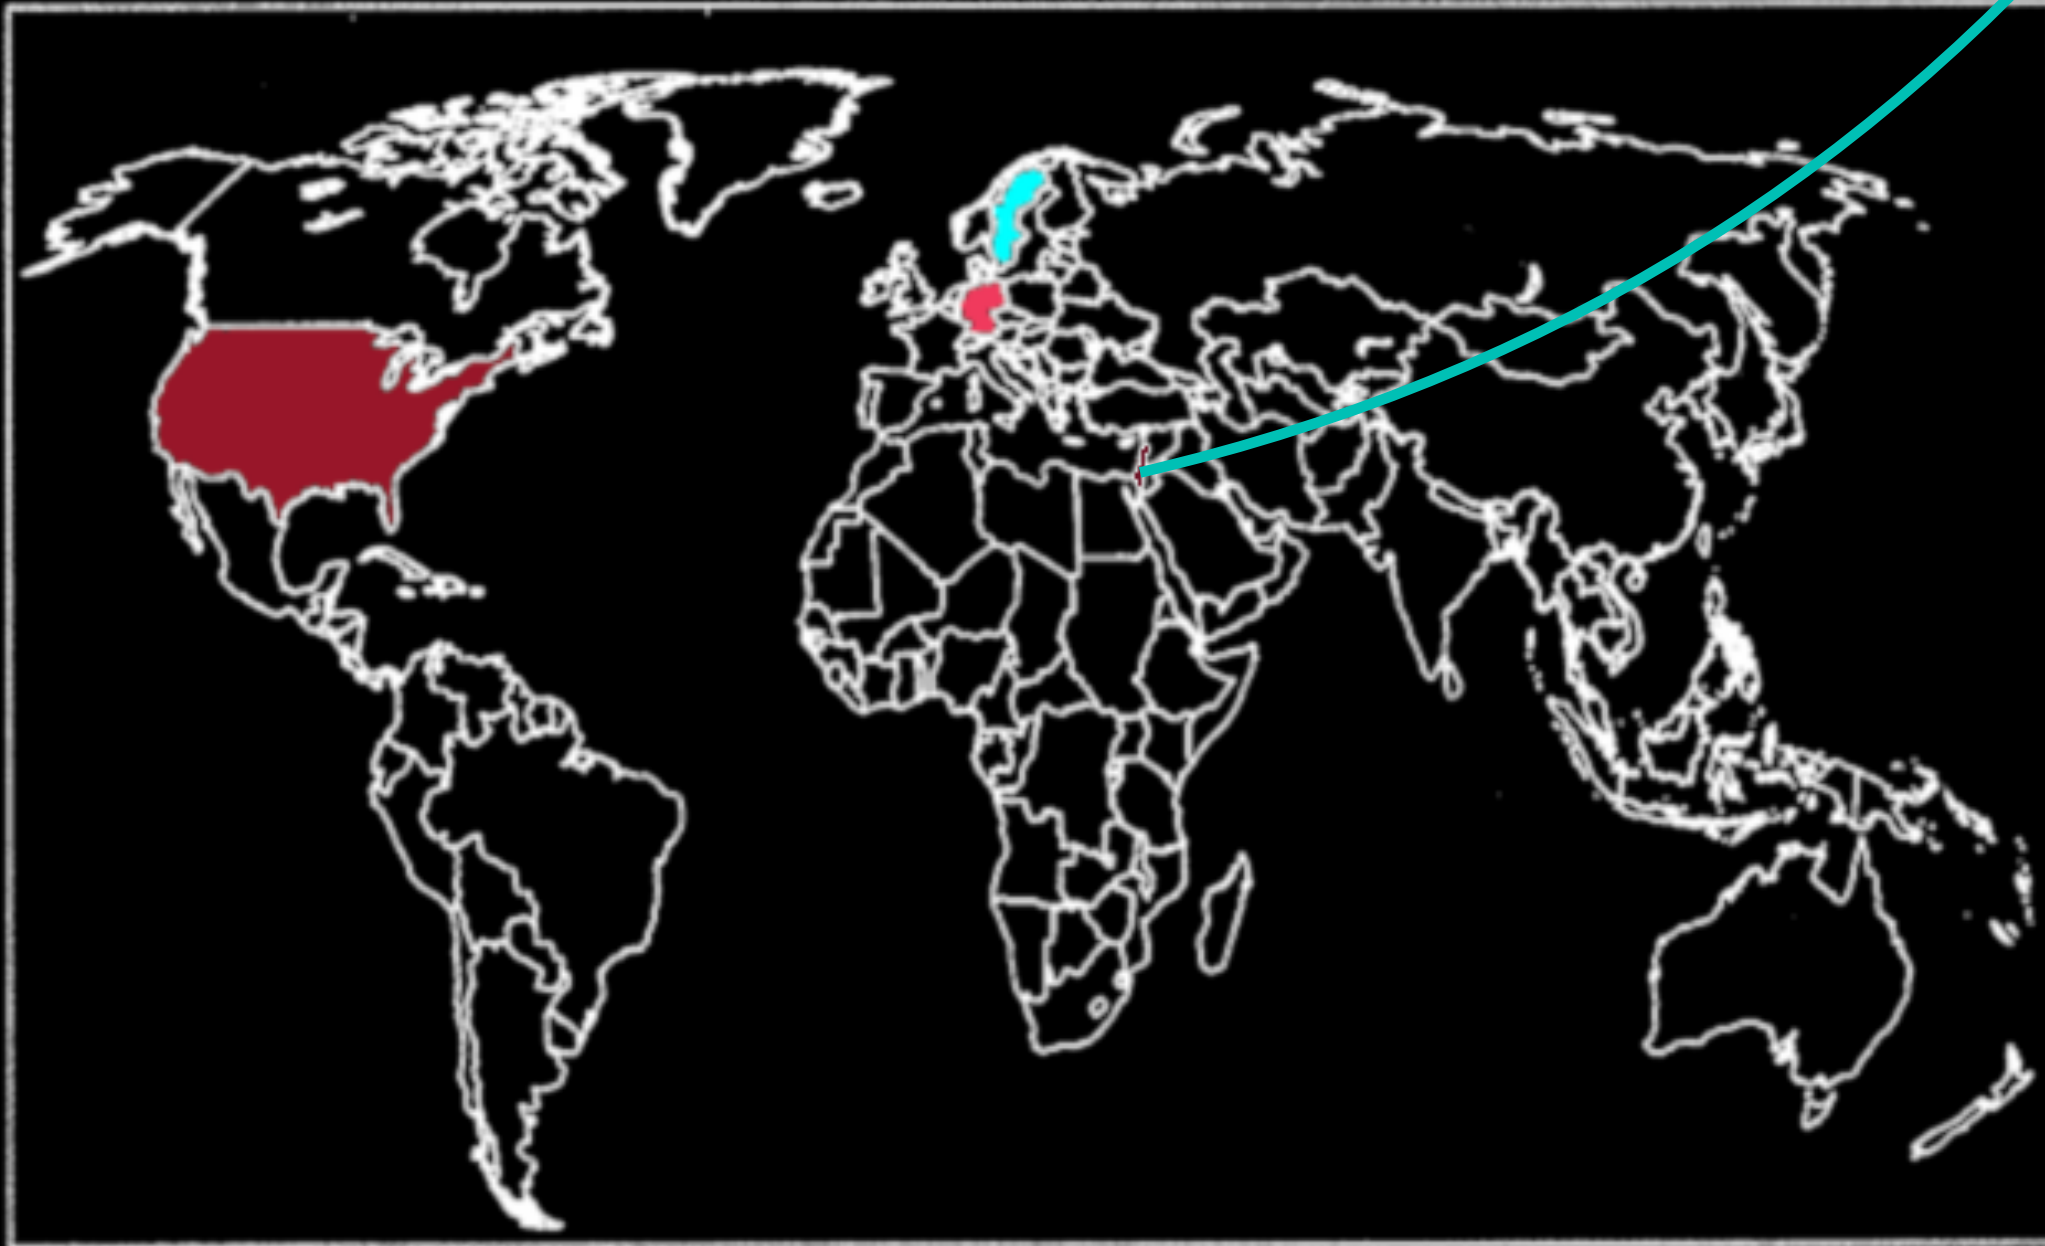

*Comparable to VR's International Postdoc grant (<https://www.vr.se/english/applying-for-funding/calls/2023-11-15-international-postdoc-within-natural-and-engineering-sciences-autumn-call.html>) "The purpose of the grant is to give newly qualified researchers with a doctoral degree from a Swedish university the opportunity to expand their networks and their competences by working abroad under secure employment conditions."

- Hosted by Prof. Joseph S.B. Mitchell, SUNY Distinguished Professor, one of the foremost researchers in Computational Geometry, Gödel Prize recipient (2010) and his wife Estie Arkin, both professors in applied math and statistics
- Many other great researchers
- Had worked with Joe briefly during my PhD
- Obtained funding from the German Academic Exchange Service (DAAD)*
- Joe creates a great collaborative working environment (CG group, now also running online)
- Lived in NYC
- Stay helped to get to know US Computational Geometers better (good to not only have a European network)
- Worked mostly on guarding problems

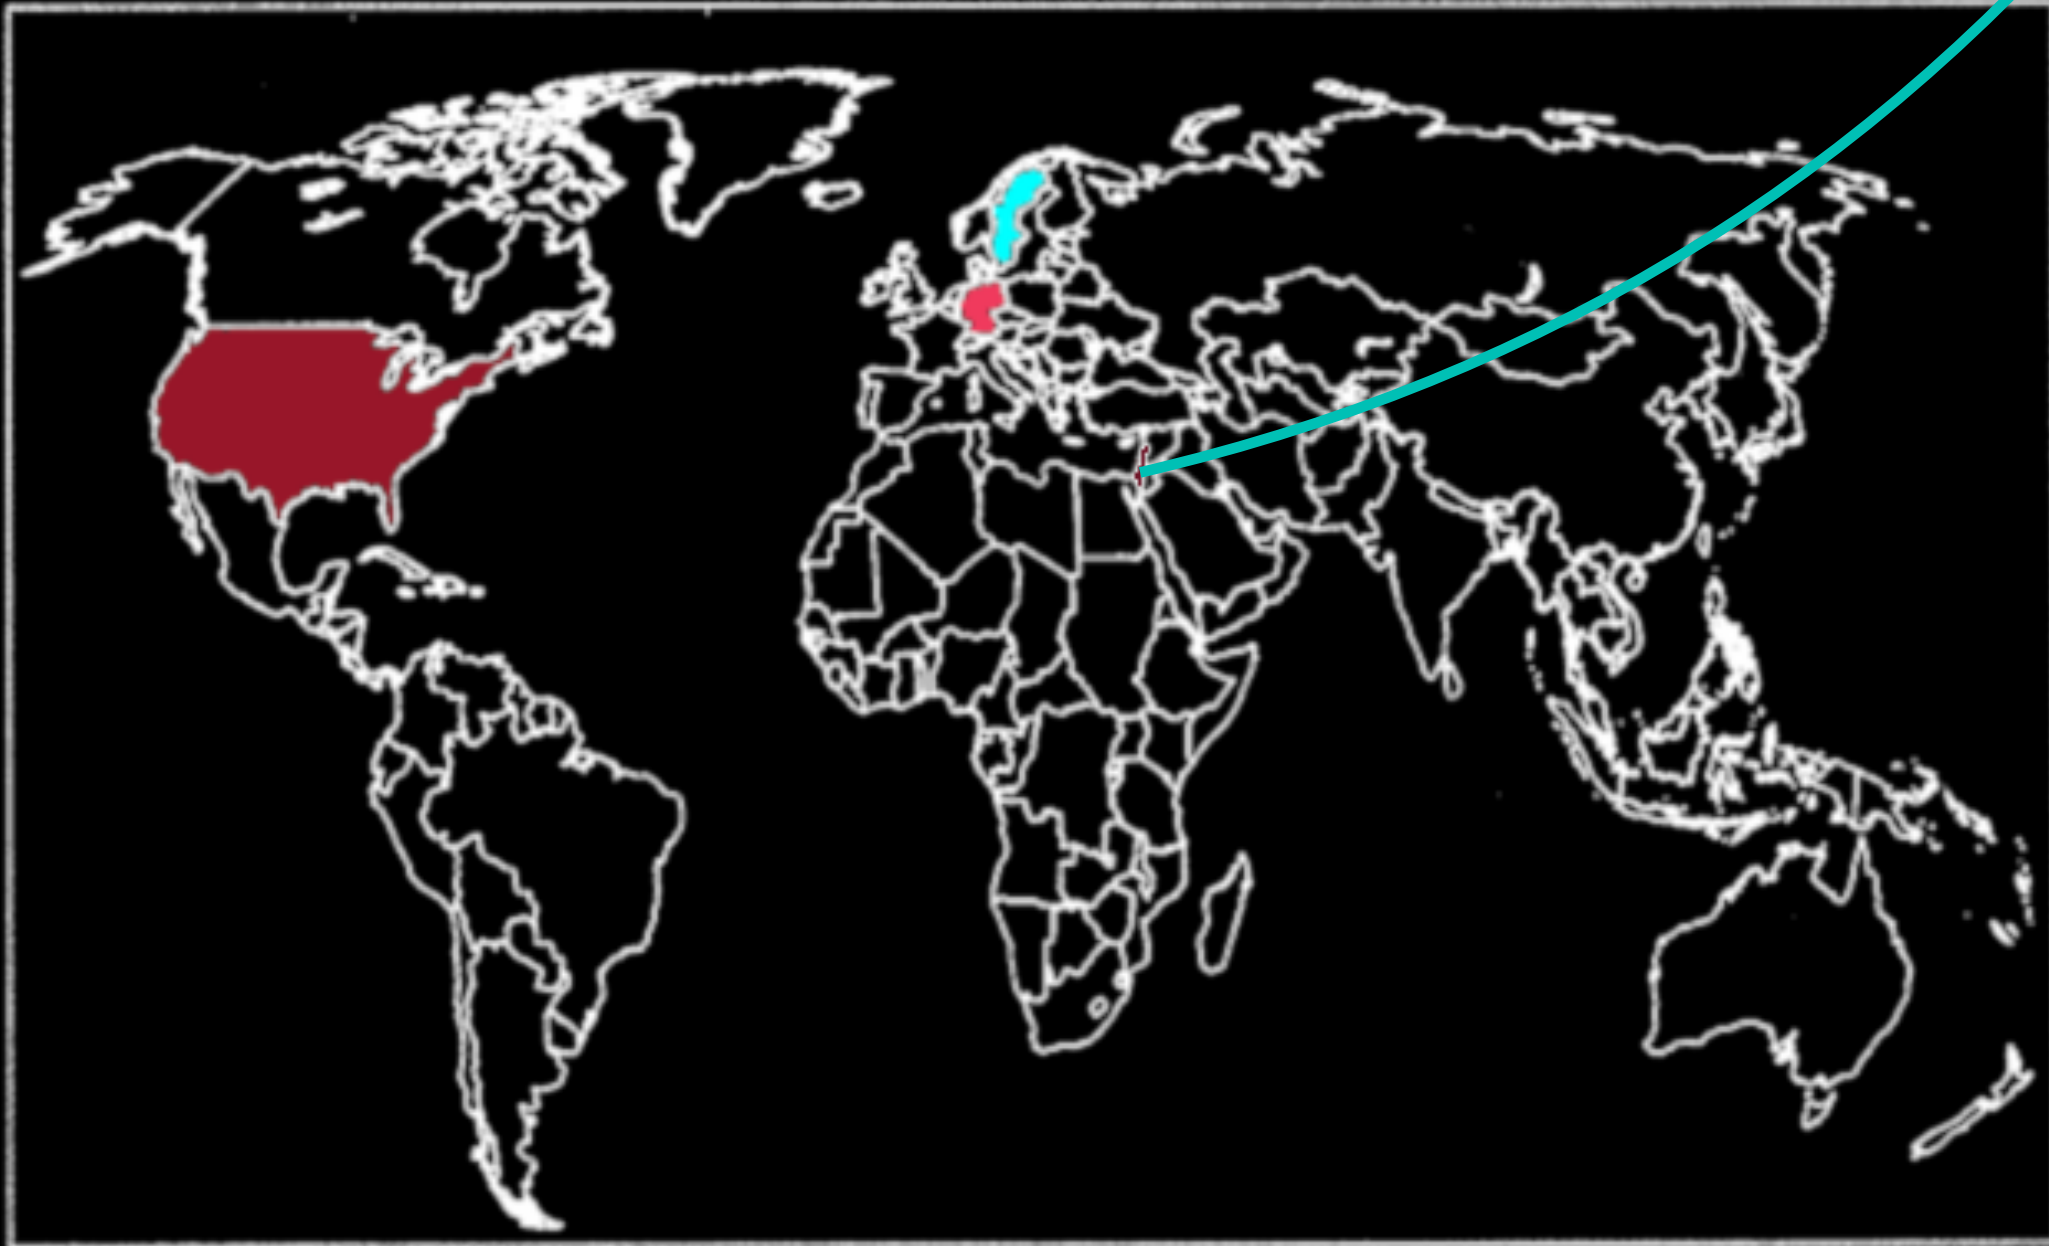

*Comparable to VR's International Postdoc grant (<https://www.vr.se/english/applying-for-funding/calls/2023-11-15-international-postdoc-within-natural-and-engineering-sciences-autumn-call.html>) "The purpose of the grant is to give newly qualified researchers with a doctoral degree from a Swedish university the opportunity to expand their networks and their competences by working abroad under secure employment conditions."

09/2014-08/2015 The Rachel and Selim Benin School of **Computer Science and Engineering**, **Israeli Center for Research Excellence in Algorithms (I-CORE Algo)**

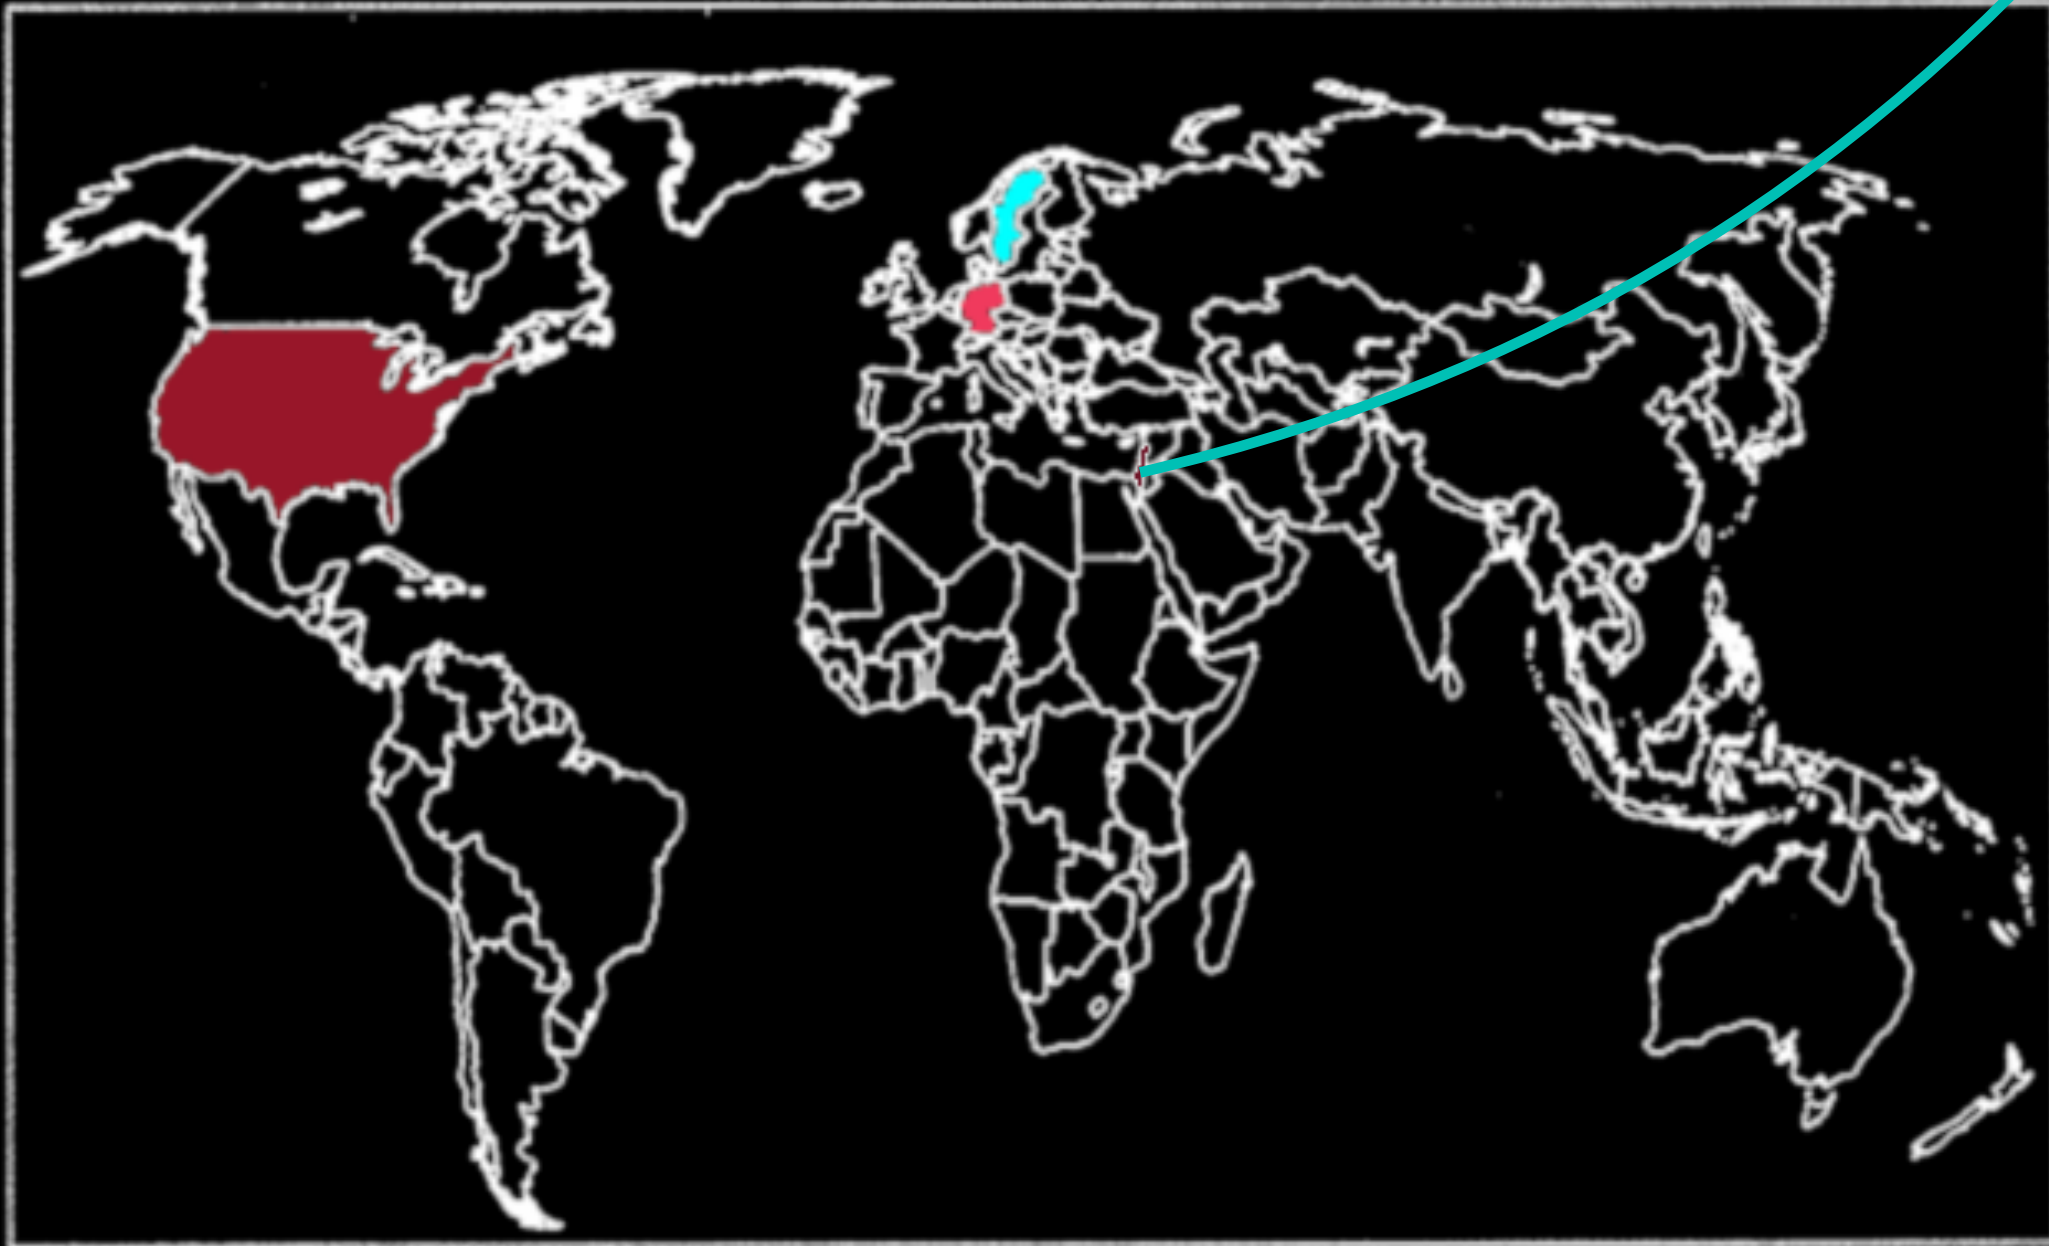

09/2014-08/2015 The Rachel and Selim Benin School of **Computer Science and Engineering**, **Israeli Center for Research Excellence in Algorithms** (I-CORE Algo)

- Had applied for a Postdoc with the Israeli Center for Research Excellence in Algorithms (you could express where you wanted to be hosted, but professors picked you, including HUJI, Weizmann institute, TAU, Technion), funded by Israel's Council of Higher Education, does not exist anymore

09/2014-08/2015 The Rachel and Selim Benin School of **Computer Science and Engineering**, **Israeli Center for Research Excellence in Algorithms** (I-CORE Algo)

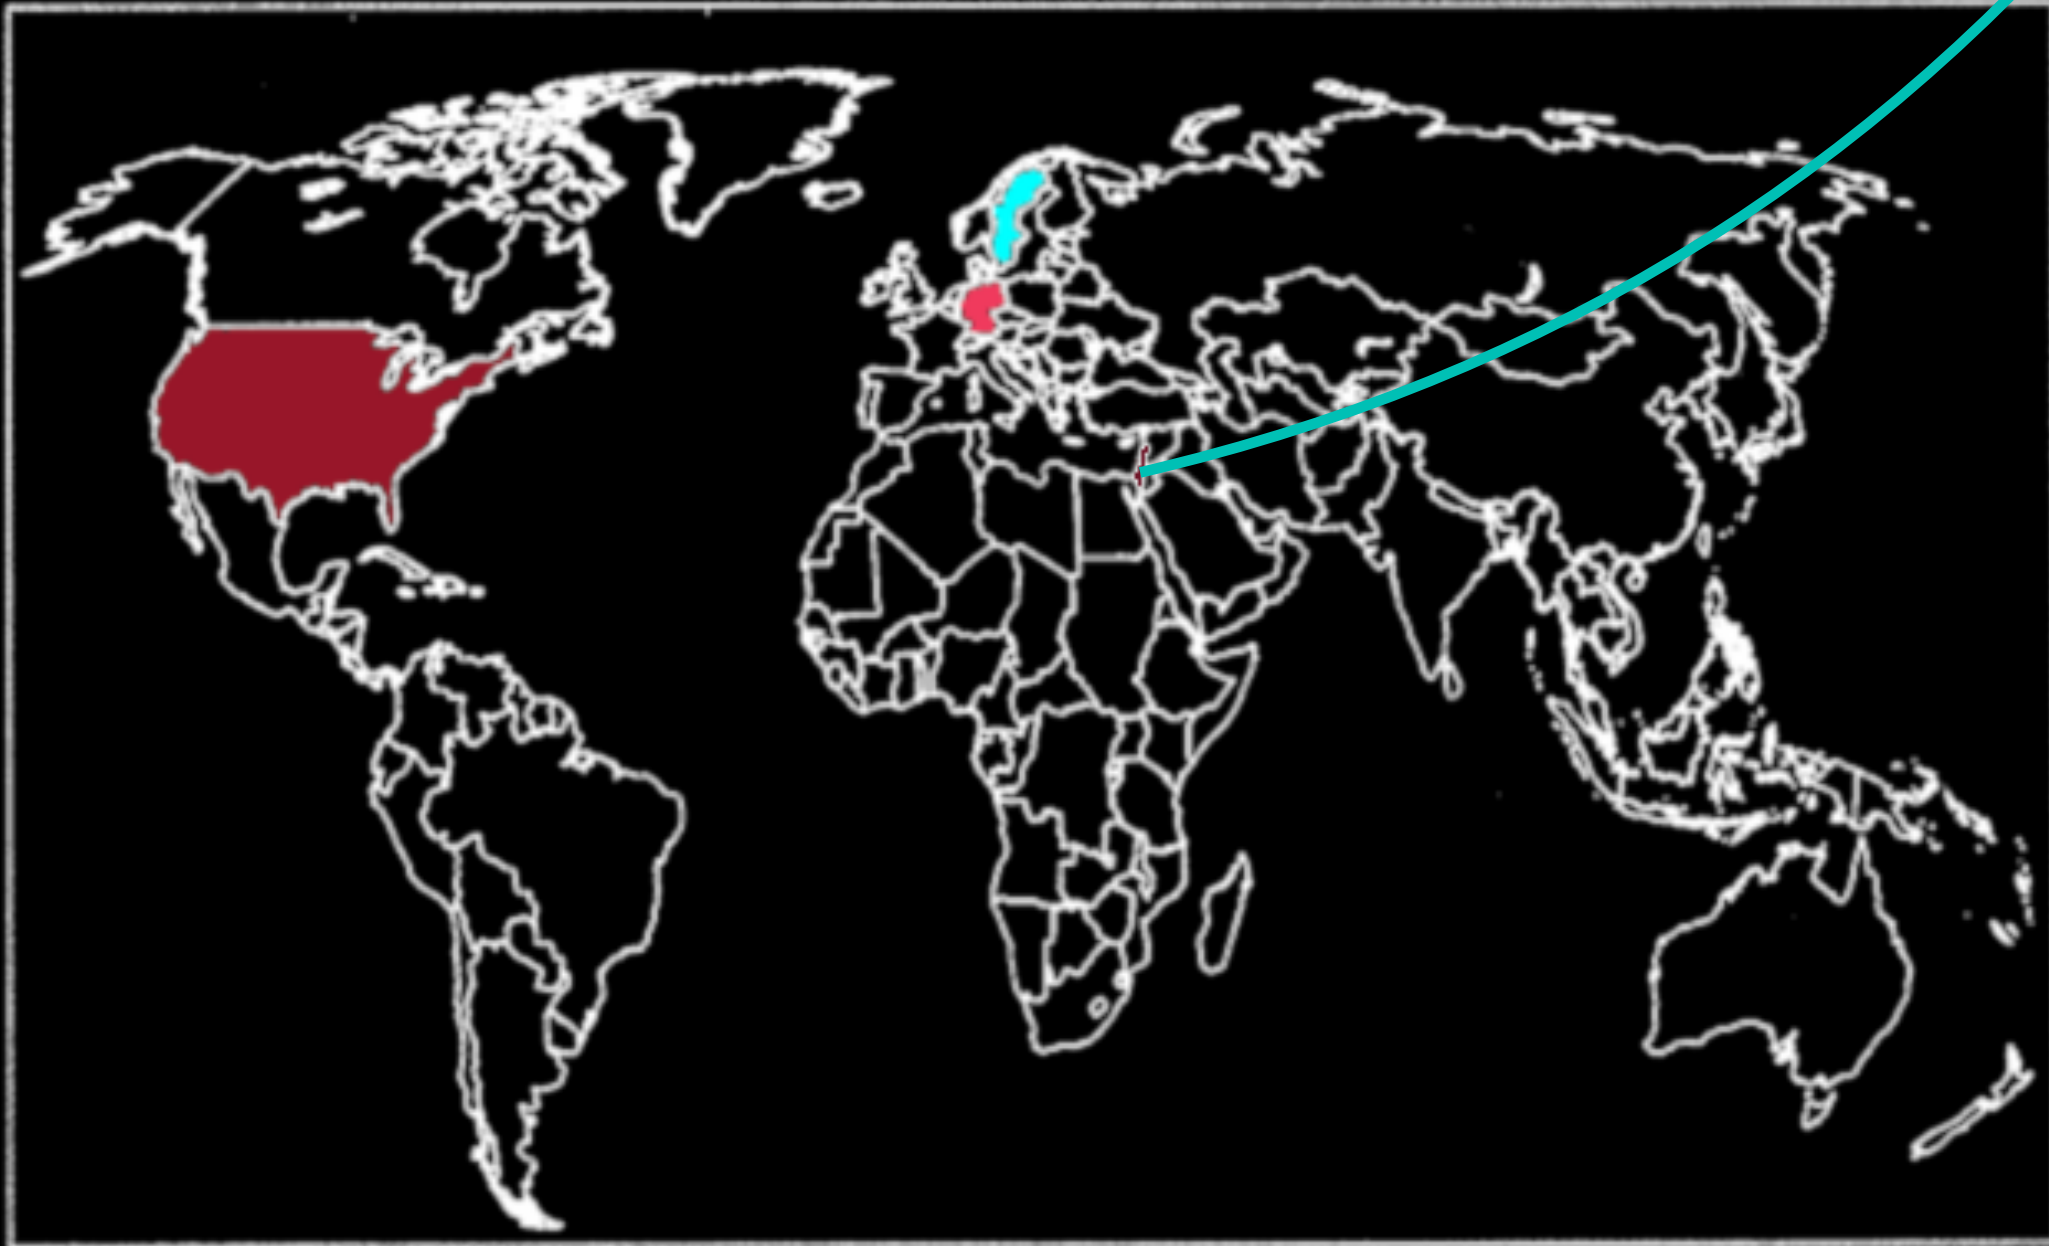

- Had applied for a Postdoc with the Israeli Center for Research Excellence in Algorithms (you could express where you wanted to be hosted, but professors picked you, including HUJI, Weizmann institute, TAU, Technion), funded by Israel's Council of Higher Education, does not exist anymore
- You came to the host institute with full funding

09/2014-08/2015 The Rachel and Selim Benin School of **Computer Science and Engineering**, **Israeli Center for Research Excellence in Algorithms** (I-CORE Algo)

- Had applied for a Postdoc with the Israeli Center for Research Excellence in Algorithms (you could express where you wanted to be hosted, but professors picked you, including HUJI, Weizmann institute, TAU, Technion), funded by Israel's Council of Higher Education, does not exist anymore
- You came to the host institute with full funding
- Hosted by professor Yuval Rabani, research in algorithms, but not CG

09/2014-08/2015 The Rachel and Selim Benin School of **Computer Science and Engineering**, **Israeli Center for Research Excellence in Algorithms** (I-CORE Algo)

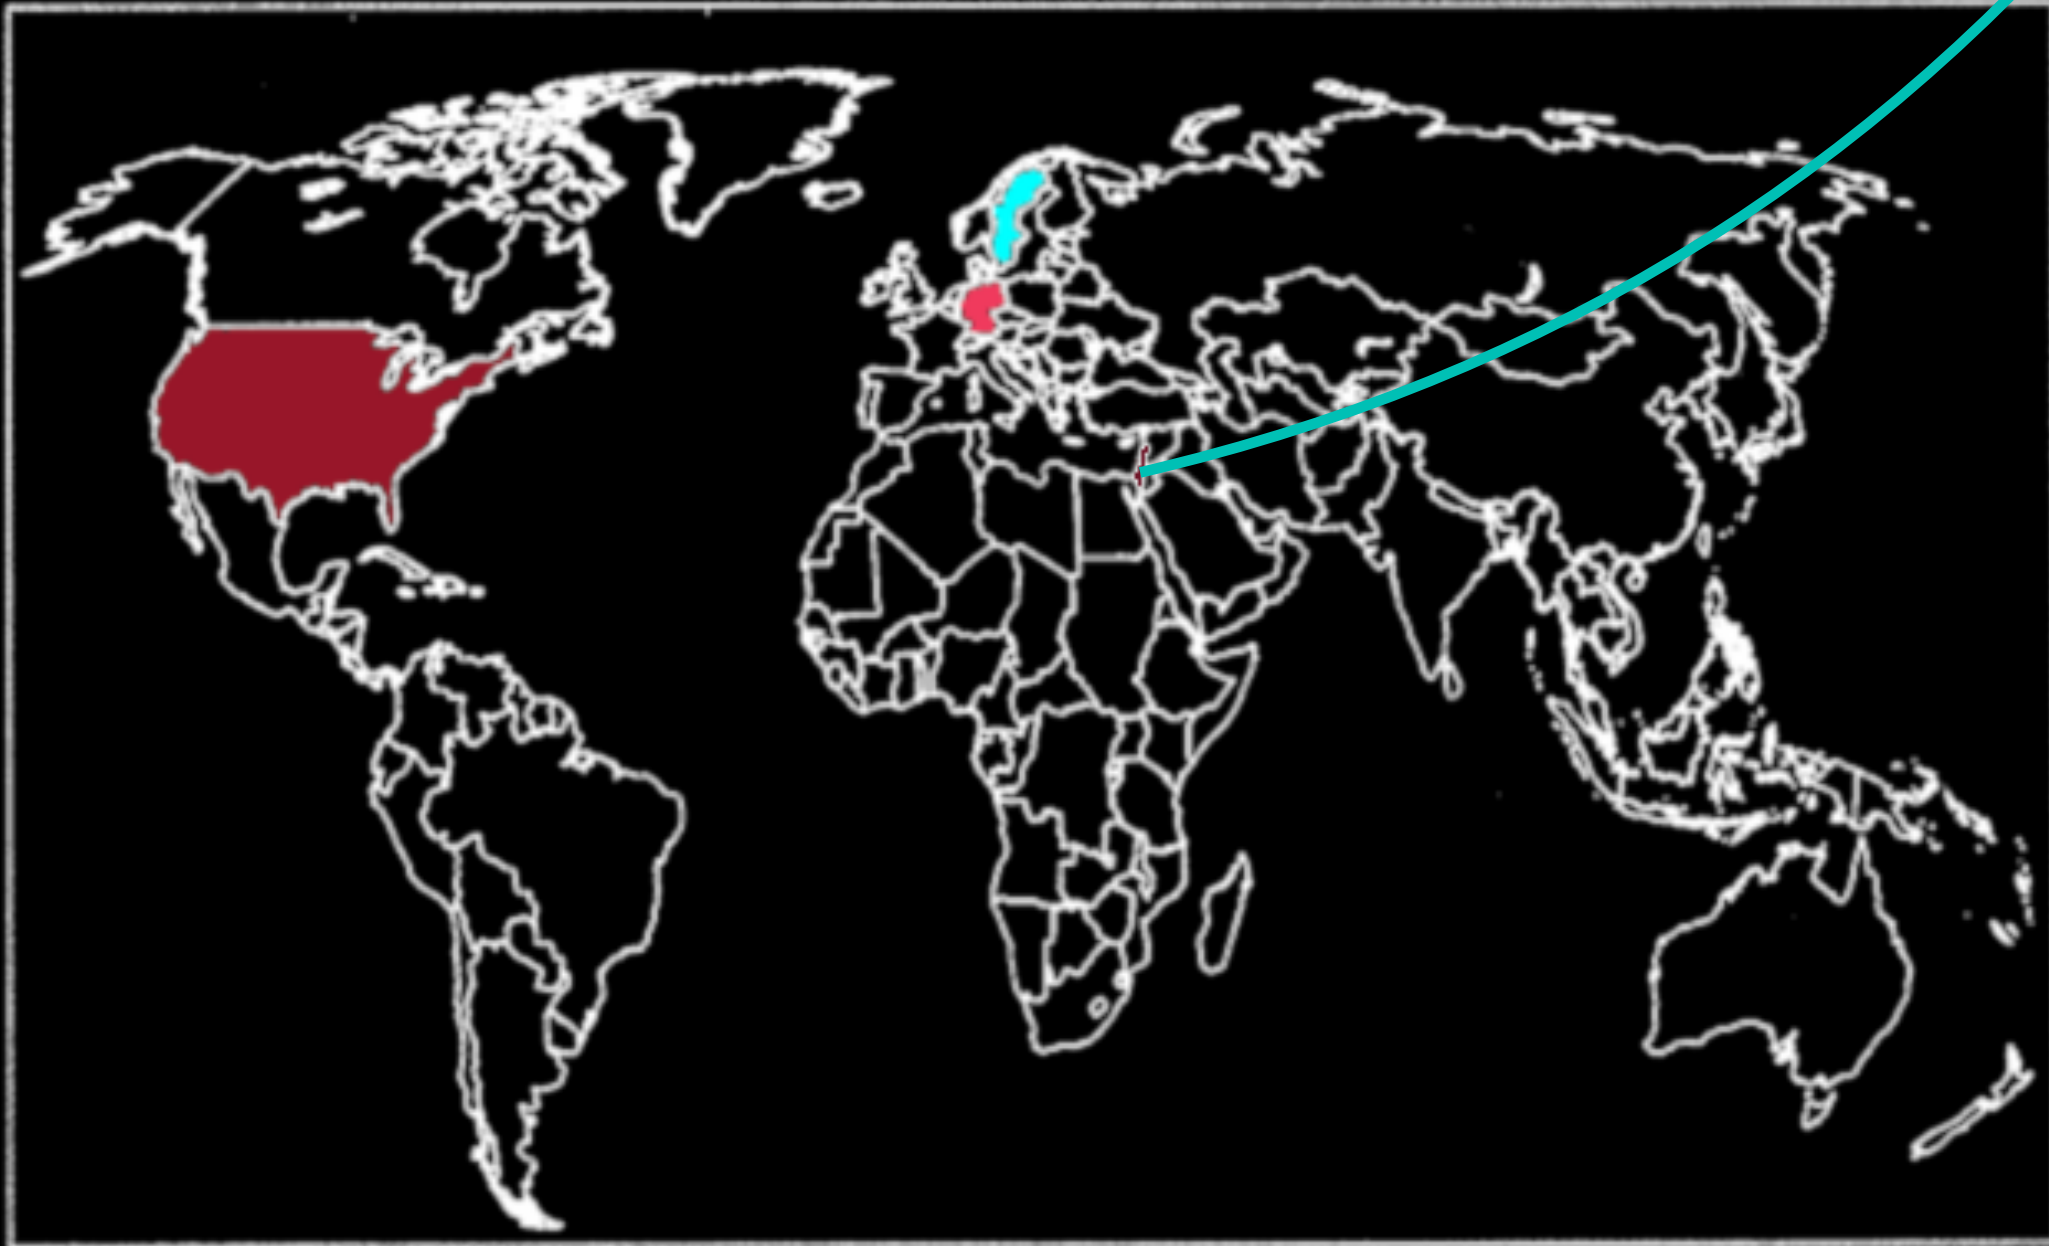

- Had applied for a Postdoc with the Israeli Center for Research Excellence in Algorithms (you could express where you wanted to be hosted, but professors picked you, including HUJI, Weizmann institute, TAU, Technion), funded by Israel's Council of Higher Education, does not exist anymore
- You came to the host institute with full funding
- Hosted by professor Yuval Rabani, research in algorithms, but not CG
- At the time opted for a position that I obtained independent from my PhD advisor, to gain scientific independence

09/2014-08/2015 The Rachel and Selim Benin School of **Computer Science and Engineering**, **Israeli Center for Research Excellence in Algorithms** (I-CORE Algo)

- Had applied for a Postdoc with the Israeli Center for Research Excellence in Algorithms (you could express where you wanted to be hosted, but professors picked you, including HUJI, Weizmann institute, TAU, Technion), funded by Israel's Council of Higher Education, does not exist anymore
- You came to the host institute with full funding
- Hosted by professor Yuval Rabani, research in algorithms, but not CG
- At the time opted for a position that I obtained independent from my PhD advisor, to gain scientific independence
- Plus:

09/2014-08/2015 The Rachel and Selim Benin School of **Computer Science and Engineering**, **Israeli Center for Research Excellence in Algorithms** (I-CORE Algo)

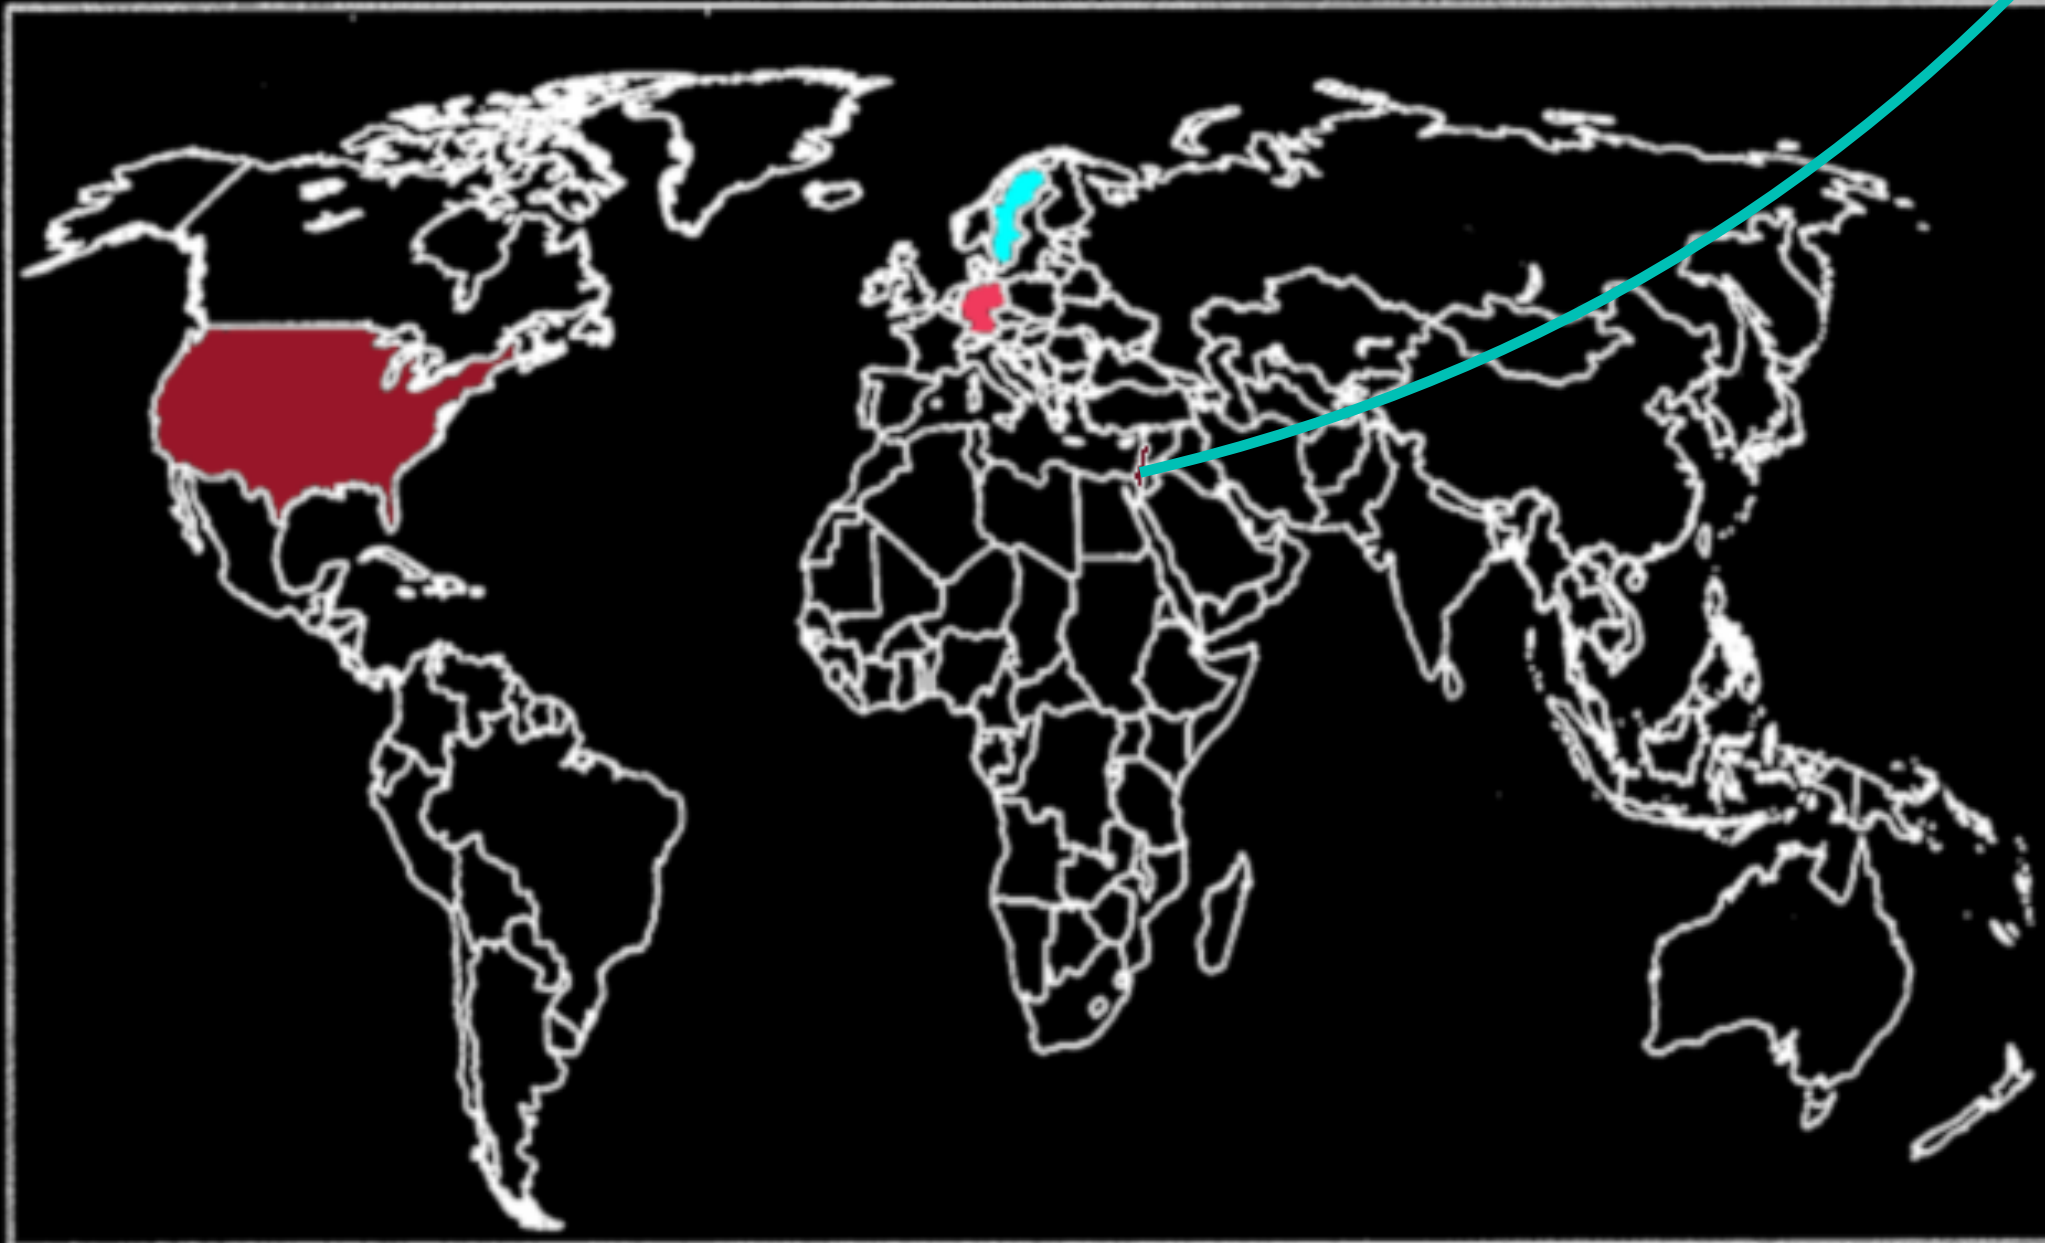

- Had applied for a Postdoc with the Israeli Center for Research Excellence in Algorithms (you could express where you wanted to be hosted, but professors picked you, including HUJI, Weizmann institute, TAU, Technion), funded by Israel's Council of Higher Education, does not exist anymore
- You came to the host institute with full funding
- Hosted by professor Yuval Rabani, research in algorithms, but not CG
- At the time opted for a position that I obtained independent from my PhD advisor, to gain scientific independence
- Plus:
 - Many CS researchers with weekly talks

09/2014-08/2015 The Rachel and Selim Benin School of **Computer Science and Engineering**, **Israeli Center for Research Excellence in Algorithms** (I-CORE Algo)

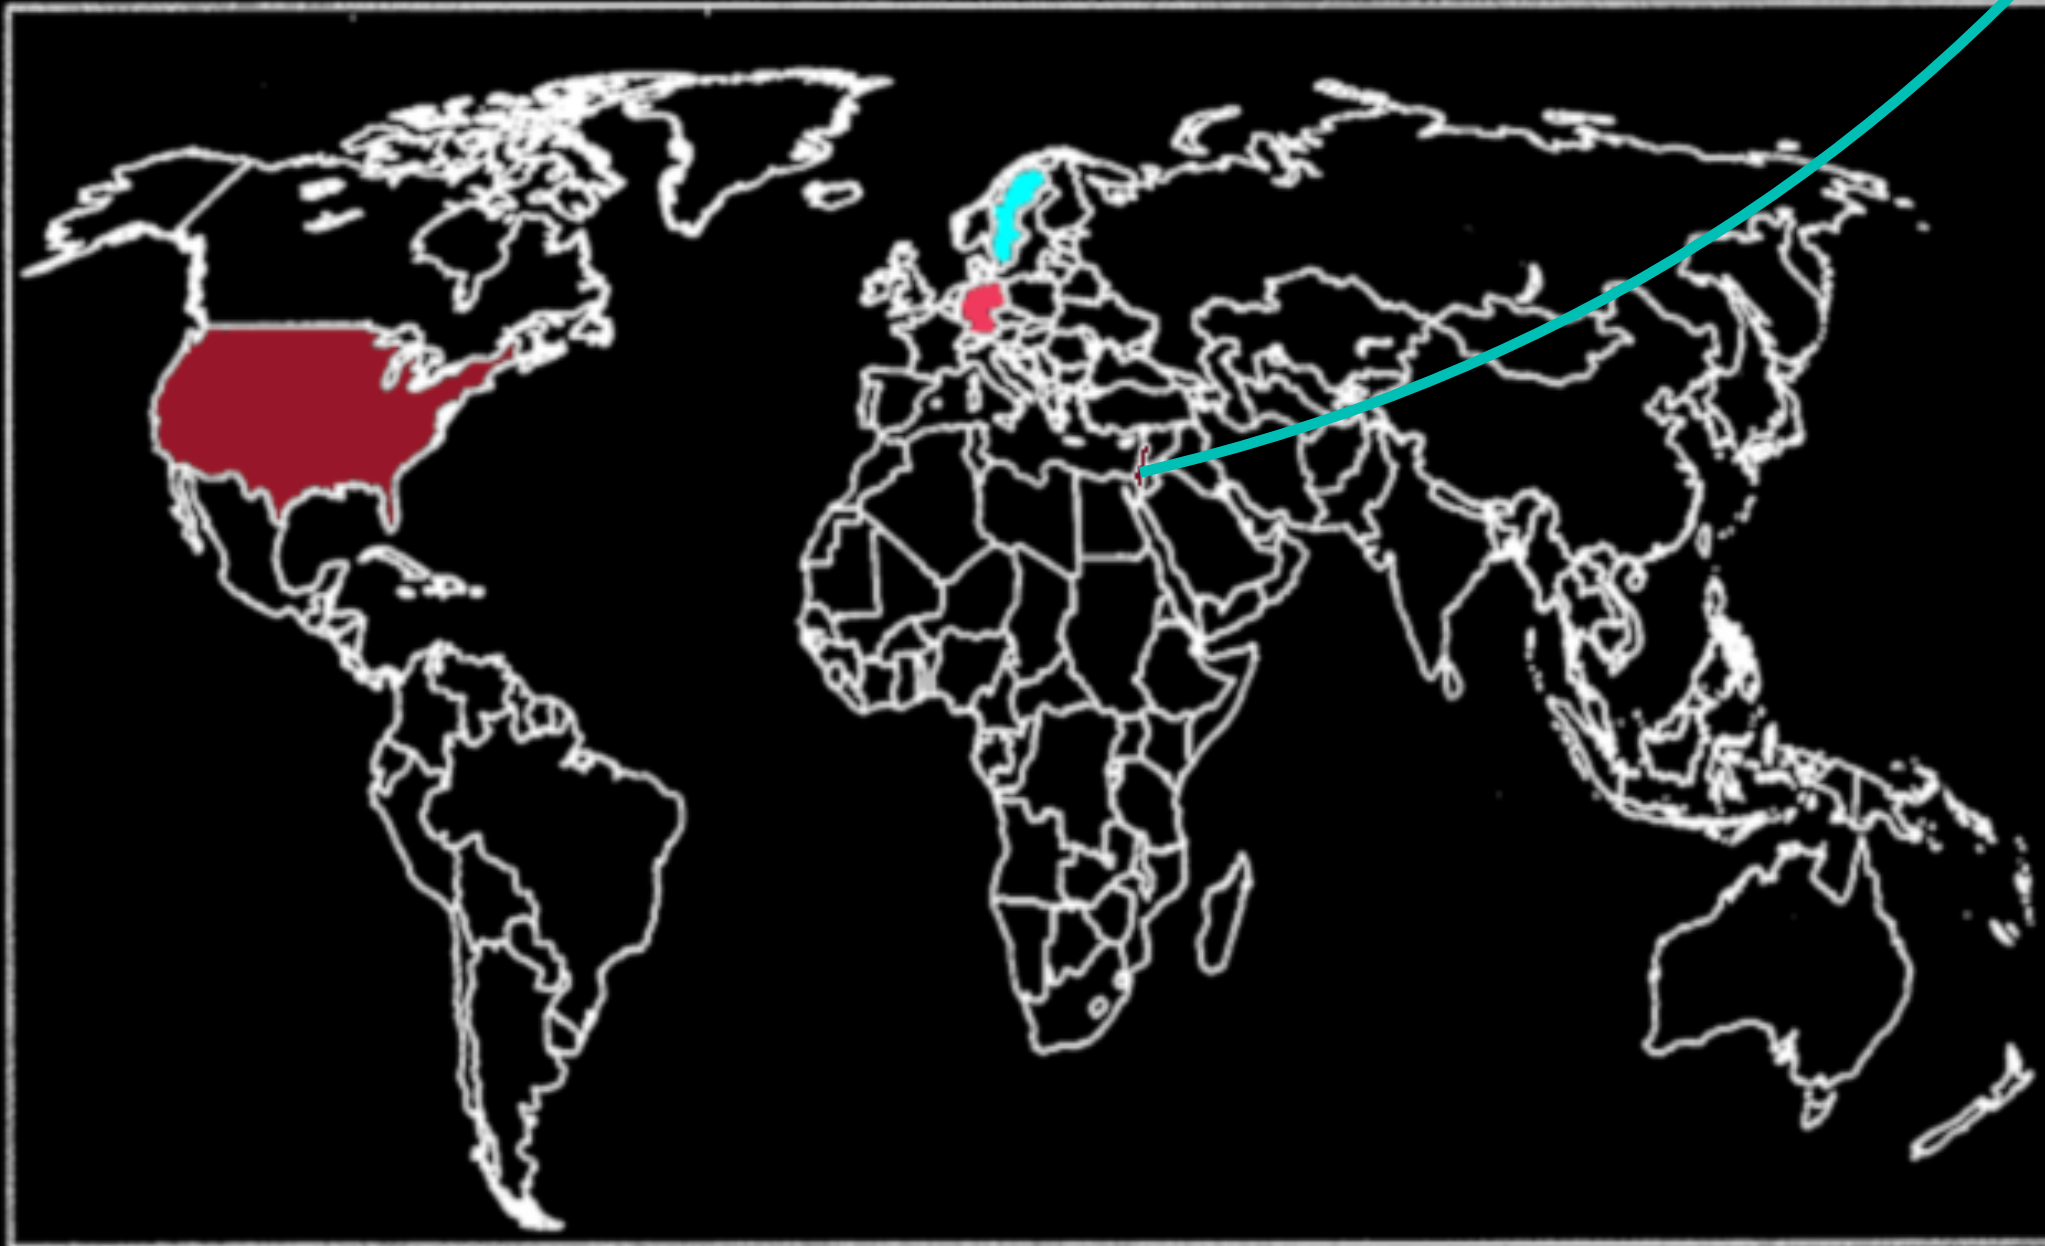

- Had applied for a Postdoc with the Israeli Center for Research Excellence in Algorithms (you could express where you wanted to be hosted, but professors picked you, including HUJI, Weizmann institute, TAU, Technion), funded by Israel's Council of Higher Education, does not exist anymore
- You came to the host institute with full funding
- Hosted by professor Yuval Rabani, research in algorithms, but not CG
- At the time opted for a position that I obtained independent from my PhD advisor, to gain scientific independence
- Plus:
 - Many CS researchers with weekly talks
 - Independent to work on "my" topics, travel money for that

09/2014-08/2015 The Rachel and Selim Benin School of **Computer Science and Engineering**, **Israeli Center for Research Excellence in Algorithms** (I-CORE Algo)

- Had applied for a Postdoc with the Israeli Center for Research Excellence in Algorithms (you could express where you wanted to be hosted, but professors picked you, including HUJI, Weizmann institute, TAU, Technion), funded by Israel's Council of Higher Education, does not exist anymore
- You came to the host institute with full funding
- Hosted by professor Yuval Rabani, research in algorithms, but not CG
- At the time opted for a position that I obtained independent from my PhD advisor, to gain scientific independence
- Plus:
 - Many CS researchers with weekly talks
 - Independent to work on "my" topics, travel money for that
- Minus:

09/2014-08/2015 The Rachel and Selim Benin School of **Computer Science and Engineering**, **Israeli Center for Research Excellence in Algorithms** (I-CORE Algo)

- Had applied for a Postdoc with the Israeli Center for Research Excellence in Algorithms (you could express where you wanted to be hosted, but professors picked you, including HUJI, Weizmann institute, TAU, Technion), funded by Israel's Council of Higher Education, does not exist anymore
- You came to the host institute with full funding
- Hosted by professor Yuval Rabani, research in algorithms, but not CG
- At the time opted for a position that I obtained independent from my PhD advisor, to gain scientific independence
- Plus:
 - Many CS researchers with weekly talks
 - Independent to work on "my" topics, travel money for that
- Minus:
 - Yuval did not have a working group at the time, so, it was only me; worked with him on a few things, but better to have a larger group to go to

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

<https://www.itn.liu.se/~chrsc91/>

09/2015 **Communications and Transport Systems @ ITN:**

09/2015-10/2017: Postdoc

11/2017-03/2020: Assistant professor (biträdande universitetslektor)

04/2020-02/2022: Associate professor (universitetslektor)

03/2022-...: Senior associate professor (biträdande professor)

- Had applied for a Postdoc in an applied project on air traffic management (ATM)

<https://www.itn.liu.se/~chrsc91/>

09/2015 **Communications and Transport Systems @ ITN:**

09/2015-10/2017: Postdoc

11/2017-03/2020: Assistant professor (biträdande universitetslektor)

04/2020-02/2022: Associate professor (universitetslektor)

03/2022-...: Senior associate professor (biträdande professor)

- Had applied for a Postdoc in an applied project on air traffic management (ATM)
- Had not worked so close to application before and I wanted to get broader there

<https://www.itn.liu.se/~chrsc91/>

09/2015 **Communications and Transport Systems @ ITN:**

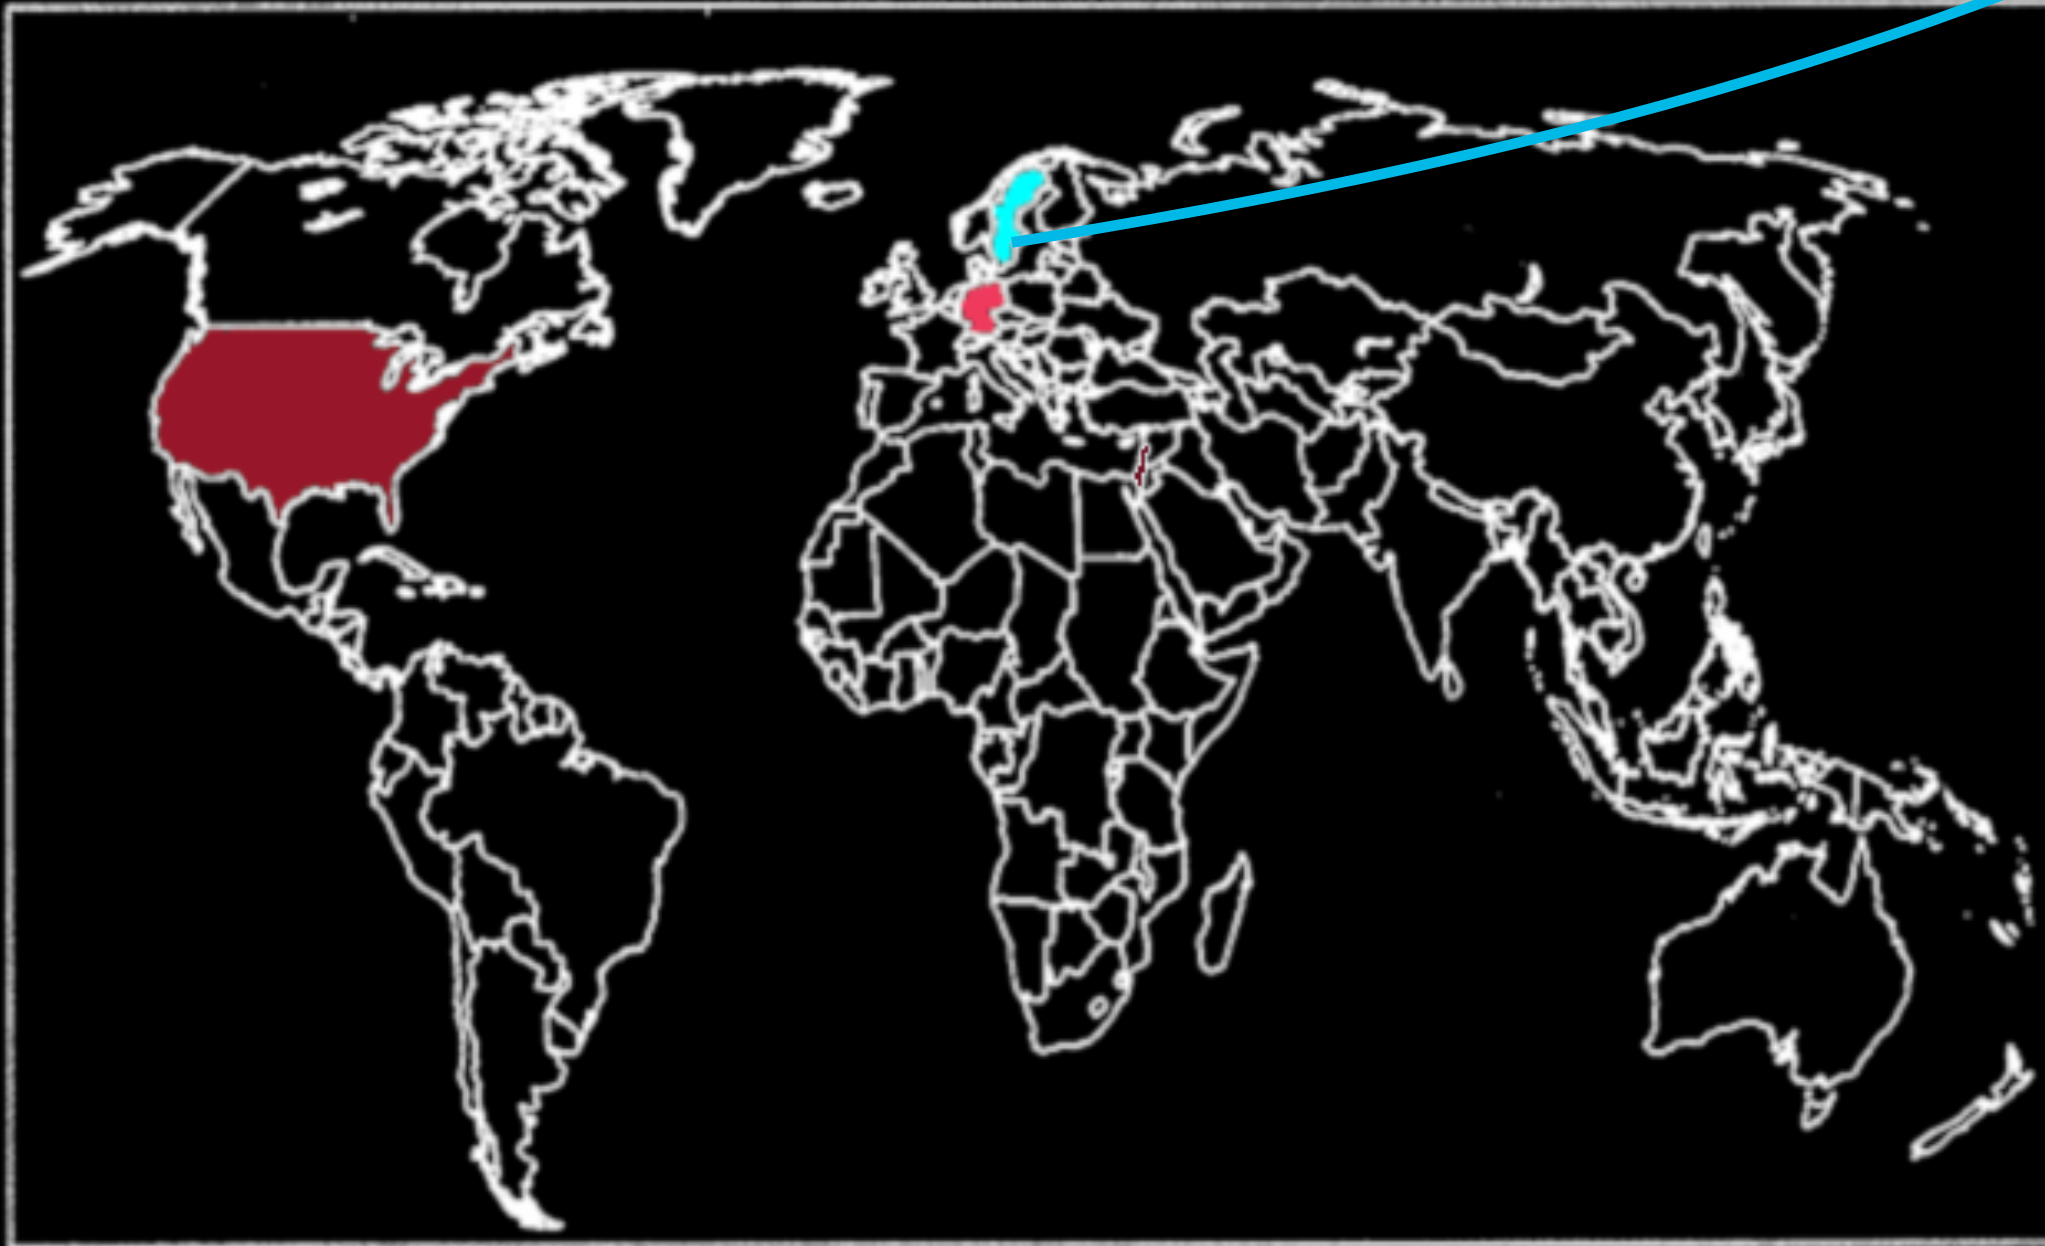

09/2015-10/2017: Postdoc

11/2017-03/2020: Assistant professor (biträdande universitetslektor)

04/2020-02/2022: Associate professor (universitetslektor)

03/2022-...: Senior associate professor (biträdande professor)

- Had applied for a Postdoc in an applied project on air traffic management (ATM)
- Had not worked so close to application before and I wanted to get broader there
- Postdoc was with Valentin Polishchuk, a computational geometer who had done his PhD with Joe (on geometric problems in ATM, flows, thick paths, etc.)

<https://www.itn.liu.se/~chrsc91/>

09/2015 **Communications and Transport Systems @ ITN:**

09/2015-10/2017: Postdoc

11/2017-03/2020: Assistant professor (biträdande universitetslektor)

04/2020-02/2022: Associate professor (universitetslektor)

03/2022-...: Senior associate professor (biträdande professor)

- Had applied for a Postdoc in an applied project on air traffic management (ATM)
- Had not worked so close to application before and I wanted to get broader there
- Postdoc was with Valentin Polishchuk, a computational geometer who had done his PhD with Joe (on geometric problems in ATM, flows, thick paths, etc.)
- ATM has many geometric aspects, but of course not only

<https://www.itn.liu.se/~chrsc91/>

09/2015 **Communications and Transport Systems @ ITN:**

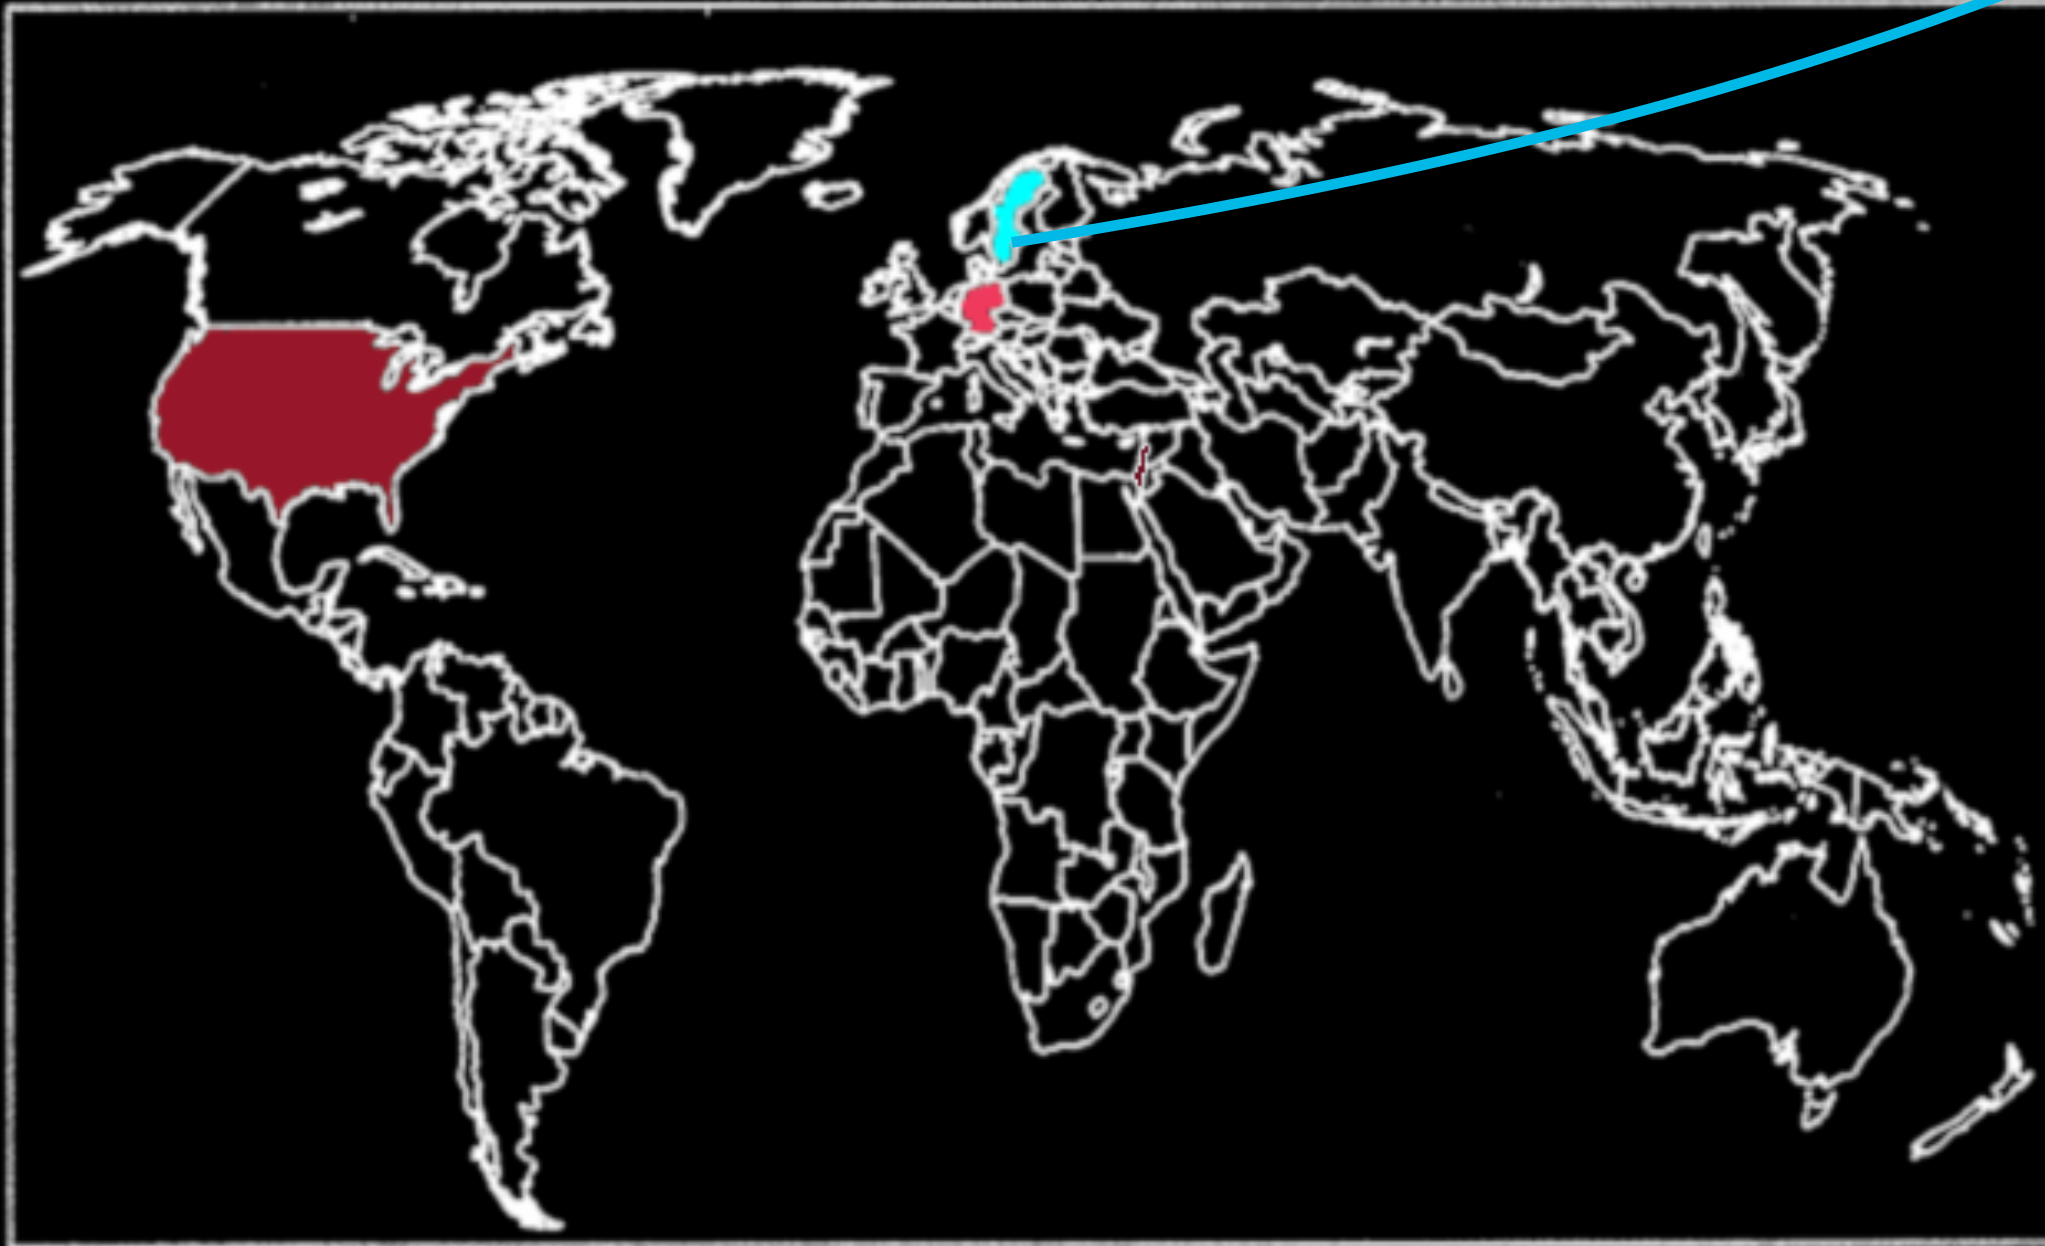

09/2015-10/2017: Postdoc

11/2017-03/2020: Assistant professor (biträdande universitetslektor)

04/2020-02/2022: Associate professor (universitetslektor)

03/2022-...: Senior associate professor (biträdande professor)

- Had applied for a Postdoc in an applied project on air traffic management (ATM)
- Had not worked so close to application before and I wanted to get broader there
- Postdoc was with Valentin Polishchuk, a computational geometer who had done his PhD with Joe (on geometric problems in ATM, flows, thick paths, etc.)
- ATM has many geometric aspects, but of course not only
- Plus:

<https://www.itn.liu.se/~chrsc91/>

09/2015 **Communications and Transport Systems @ ITN:**

09/2015-10/2017: Postdoc

11/2017-03/2020: Assistant professor (biträdande universitetslektor)

04/2020-02/2022: Associate professor (universitetslektor)

03/2022-...: Senior associate professor (biträdande professor)

- Had applied for a Postdoc in an applied project on air traffic management (ATM)
- Had not worked so close to application before and I wanted to get broader there
- Postdoc was with Valentin Polishchuk, a computational geometer who had done his PhD with Joe (on geometric problems in ATM, flows, thick paths, etc.)
- ATM has many geometric aspects, but of course not only
- Plus:
 - Extended even to other application areas (e.g., rail)

<https://www.itn.liu.se/~chrsc91/>

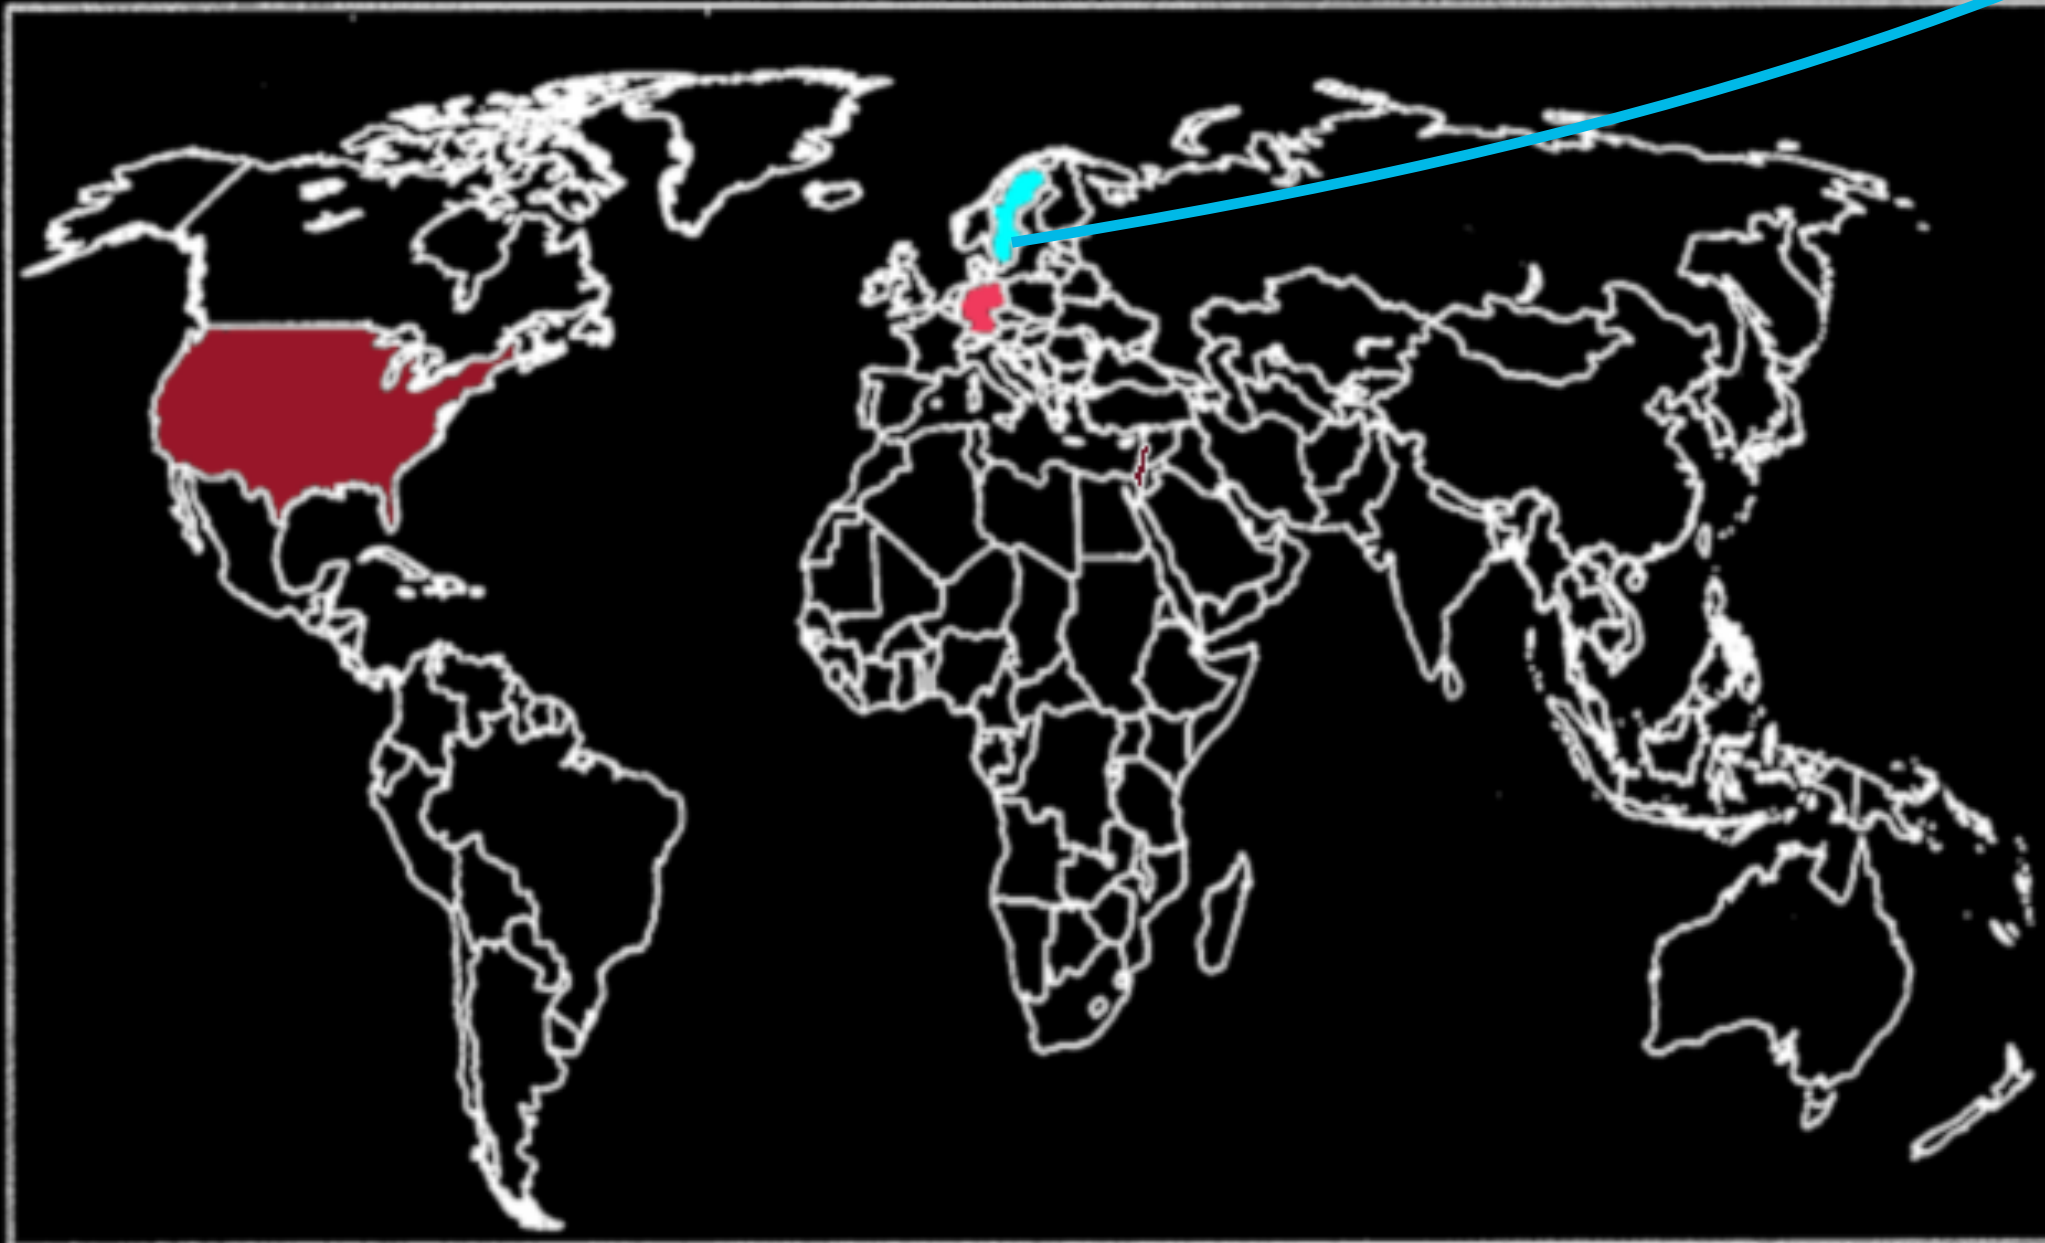

09/2015 **Communications and Transport Systems @ ITN:**

09/2015-10/2017: Postdoc

11/2017-03/2020: Assistant professor (biträdande universitetslektor)

04/2020-02/2022: Associate professor (universitetslektor)

03/2022-...: Senior associate professor (biträdande professor)

- Had applied for a Postdoc in an applied project on air traffic management (ATM)
- Had not worked so close to application before and I wanted to get broader there
- Postdoc was with Valentin Polishchuk, a computational geometer who had done his PhD with Joe (on geometric problems in ATM, flows, thick paths, etc.)
- ATM has many geometric aspects, but of course not only
- Plus:
 - Extended even to other application areas (e.g., rail)
 - Nice working environment

<https://www.itn.liu.se/~chrsc91/>

09/2015 **Communications and Transport Systems @ ITN:**

09/2015-10/2017: Postdoc

11/2017-03/2020: Assistant professor (biträdande universitetslektor)

04/2020-02/2022: Associate professor (universitetslektor)

03/2022-...: Senior associate professor (biträdande professor)

- Had applied for a Postdoc in an applied project on air traffic management (ATM)
- Had not worked so close to application before and I wanted to get broader there
- Postdoc was with Valentin Polishchuk, a computational geometer who had done his PhD with Joe (on geometric problems in ATM, flows, thick paths, etc.)
- ATM has many geometric aspects, but of course not only
- Plus:
 - Extended even to other application areas (e.g., rail)
 - Nice working environment
 - Well-structured options for further career

<https://www.itn.liu.se/~chrsc91/>

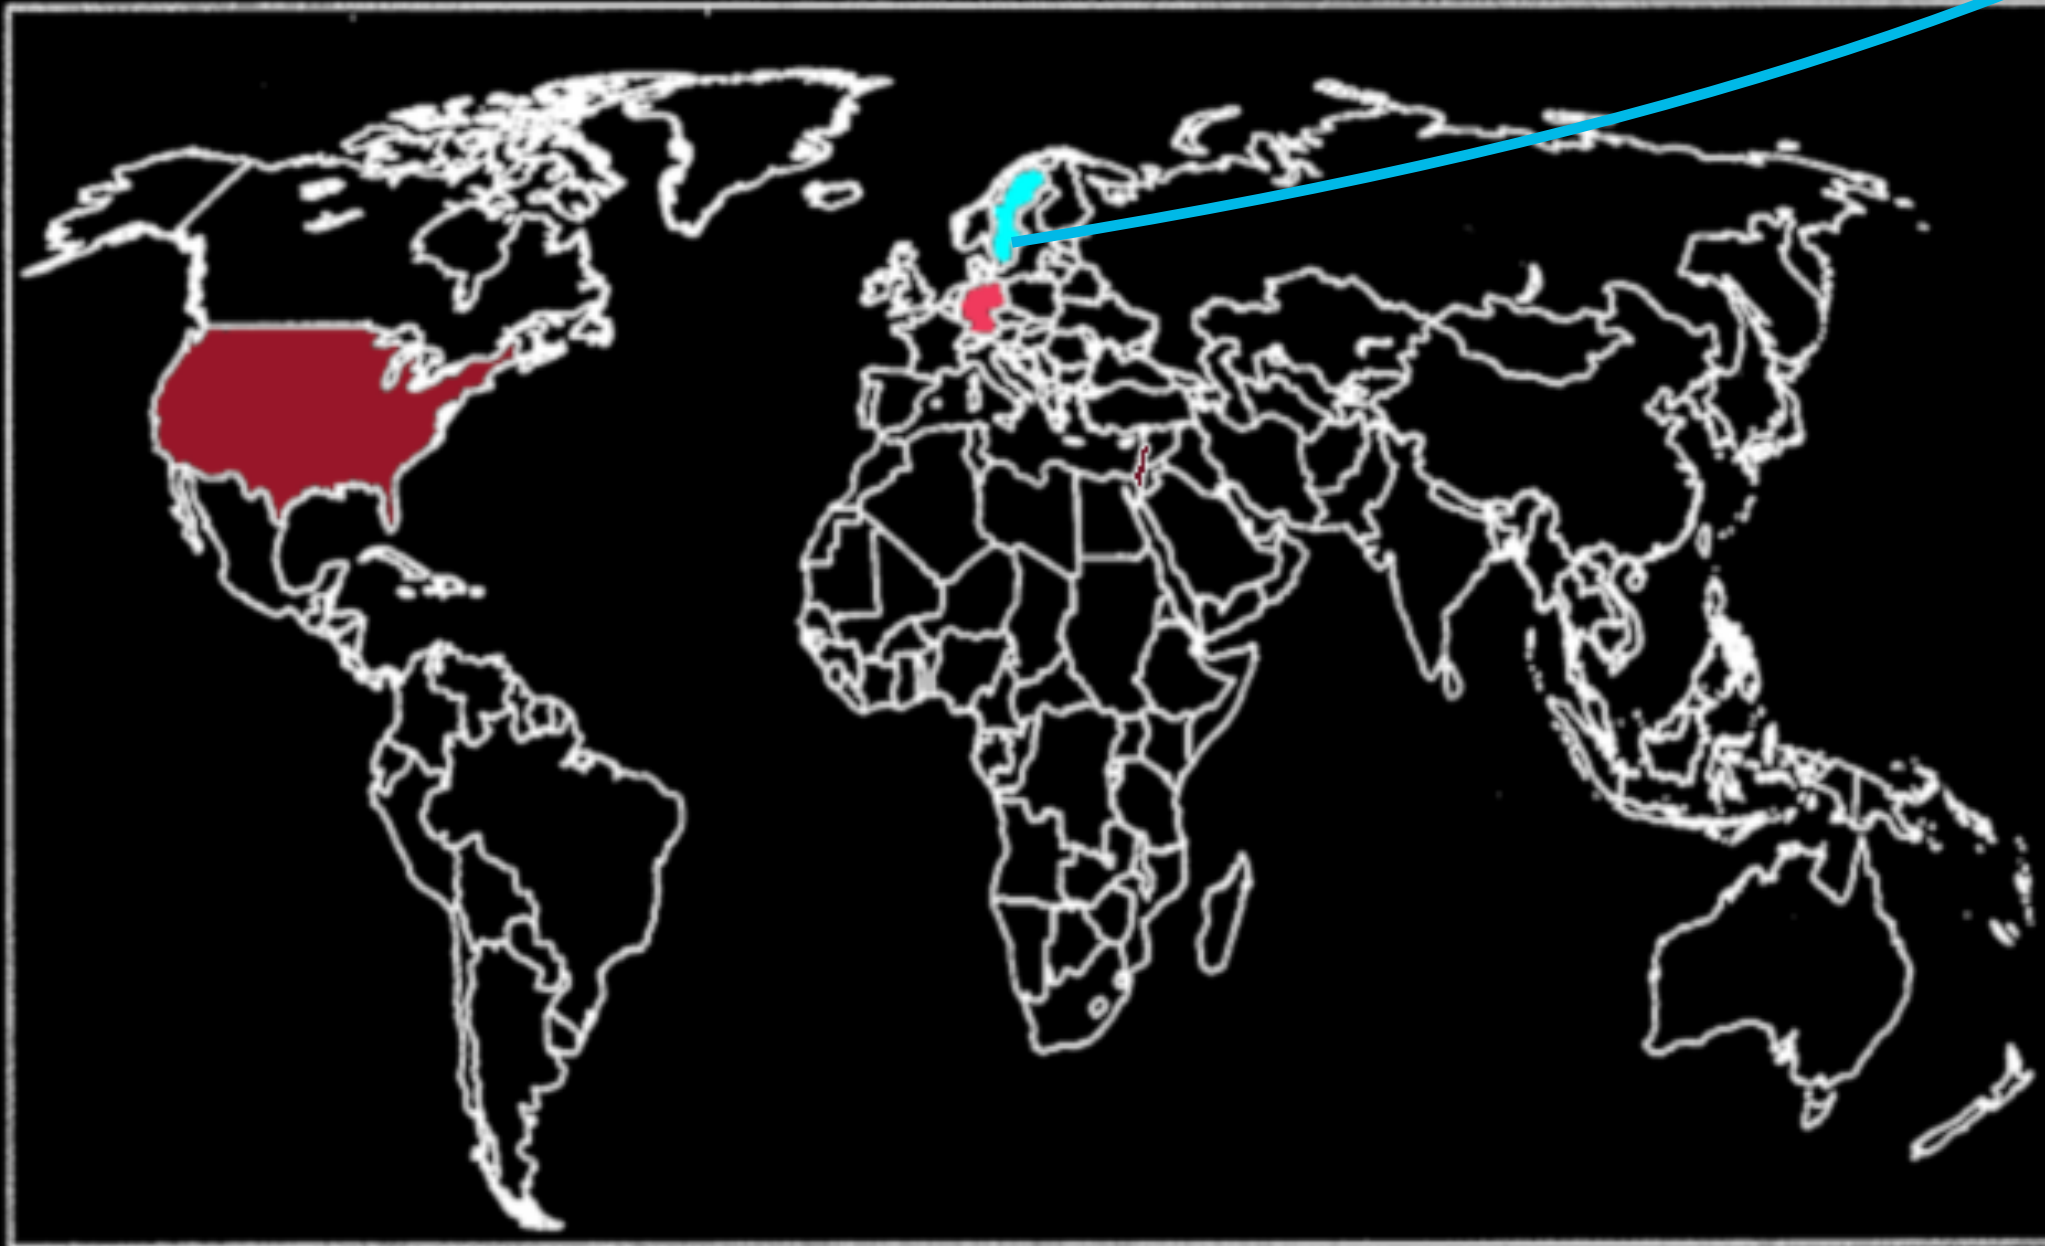

09/2015 **Communications and Transport Systems @ ITN:**

09/2015-10/2017: Postdoc

11/2017-03/2020: Assistant professor (biträdande universitetslektor)

04/2020-02/2022: Associate professor (universitetslektor)

03/2022-...: Senior associate professor (biträdande professor)

- Had applied for a Postdoc in an applied project on air traffic management (ATM)
- Had not worked so close to application before and I wanted to get broader there
- Postdoc was with Valentin Polishchuk, a computational geometer who had done his PhD with Joe (on geometric problems in ATM, flows, thick paths, etc.)
- ATM has many geometric aspects, but of course not only
- Plus:
 - Extended even to other application areas (e.g., rail)
 - Nice working environment
 - Well-structured options for further career
 - I already spoke Swedish, so, probably made for an easier start

<https://www.itn.liu.se/~chrsc91/>

09/2015 **Communications and Transport Systems @ ITN:**

09/2015-10/2017: Postdoc

11/2017-03/2020: Assistant professor (biträdande universitetslektor)

04/2020-02/2022: Associate professor (universitetslektor)

03/2022-...: Senior associate professor (biträdande professor)

- Had applied for a Postdoc in an applied project on air traffic management (ATM)
- Had not worked so close to application before and I wanted to get broader there

 - Extended even to other application areas (e.g., rail)
 - Nice working environment
 - Well-structured options for further career
 - I already spoke Swedish, so, probably made for an easier start
 - Switch worked well (now, for example, on the Scientific Committee of the European Union Aviation Safety Agency (EASA))
- Minus:

<https://www.itn.liu.se/~chrsc91/>

09/2015 **Communications and Transport Systems @ ITN:**

09/2015-10/2017: Postdoc

11/2017-03/2020: Assistant professor (biträdande universitetslektor)

04/2020-02/2022: Associate professor (universitetslektor)

03/2022-...: Senior associate professor (biträdande professor)

- Had applied for a Postdoc in an applied project on air traffic management (ATM)
- Had not worked so close to application before and I wanted to get broader there
- Postdoc was with Valentin Polishchuk, a computational geometer who had done his PhD with Joe (on geometric problems in ATM, flows, thick paths, etc.)
- ATM has many geometric aspects, but of course not only
- Plus:
 - Extended even to other application areas (e.g., rail)
 - Nice working environment
 - Well-structured options for further career
 - I already spoke Swedish, so, probably made for an easier start
 - Switch worked well (now, for example, on the Scientific Committee of the European Union Aviation Safety Agency (EASA))
- Minus:
 - The switch to the application areas cost most of my time in the beginning, so, for a couple of years I did way less theoretical research

<https://www.itn.liu.se/~chrsc91/>

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

- Had applied for a Postdoc in an applied project on air traffic management (ATM)
- Had not worked so close to application before and I wanted to get broader there
- Postdoc was with Valentin Polishchuk, a computational geometer who had done his PhD with Joe (on geometric problems in ATM, flows, thick paths, etc.)
- ATM has many geometric aspects, but of course not only
- Plus:

 - Nice working environment
 - Well-structured options for further career
 - I already spoke Swedish, so, probably made for an easier start
 - Switch worked well (now, for example, on the Scientific Committee of the European Union Aviation Safety Agency (EASA))
- Minus:
 - The switch to the application areas cost most of my time in the beginning, so, for a couple of years I did way less theoretical research
 - Combining CG with specific application areas manoeuvres you in a bit of a niche, which might make a later change more difficult: you usually apply for positions either in theory or in certain applications, a part of your CV will not be valued a lot

Why Do a Postdoc at All? Pros and Cons

Pros:

Cons:

Why Do a Postdoc at All? Pros and Cons

Pros:

- You get international experience

Cons:

Why Do a Postdoc at All? Pros and Cons

Pros:

- You get international experience
- You get experience with different ways of working and mentoring—extended training

Cons:

Why Do a Postdoc at All? Pros and Cons

Pros:

- You get international experience
- You get experience with different ways of working and mentoring—extended training
- You get to know different educational and organisational systems

Cons:

Why Do a Postdoc at All? Pros and Cons

Pros:

- You get international experience
- You get experience with different ways of working and mentoring—extended training
- You get to know different educational and organisational systems
- You get to know a new culture/country

Cons:

Why Do a Postdoc at All? Pros and Cons

Pros:

- You get international experience
- You get experience with different ways of working and mentoring—extended training
- You get to know different educational and organisational systems
- You get to know a new culture/country
- Research independent of your PhD supervisor

Cons:

Why Do a Postdoc at All? Pros and Cons

Pros:

- You get international experience
- You get experience with different ways of working and mentoring—extended training
- You get to know different educational and organisational systems
- You get to know a new culture/country
- Research independent of your PhD supervisor
- You will have few teaching or administrative responsibilities (at least true outside of Sweden), freeing you not only to publish, but to pursue further research

Cons:

Why Do a Postdoc at All? Pros and Cons

Pros:

- You get international experience
- You get experience with different ways of working and mentoring—extended training
- You get to know different educational and organisational systems
- You get to know a new culture/country
- Research independent of your PhD supervisor
- You will have few teaching or administrative responsibilities (at least true outside of Sweden), freeing you not only to publish, but to pursue further research
- You will have time to send in numerous job applications

Cons:

Why Do a Postdoc at All? Pros and Cons

Pros:

- You get international experience
- You get experience with different ways of working and mentoring—extended training
- You get to know different educational and organisational systems
- You get to know a new culture/country
- Research independent of your PhD supervisor
- You will have few teaching or administrative responsibilities (at least true outside of Sweden), freeing you not only to publish, but to pursue further research
- You will have time to send in numerous job applications
- You will have more time to think through what you want to do with your career

Cons:

Why Do a Postdoc at All? Pros and Cons

Pros:

- You get international experience
- You get experience with different ways of working and mentoring—extended training
- You get to know different educational and organisational systems
- You get to know a new culture/country
- Research independent of your PhD supervisor
- You will have few teaching or administrative responsibilities (at least true outside of Sweden), freeing you not only to publish, but to pursue further research
- You will have time to send in numerous job applications
- You will have more time to think through what you want to do with your career
- Often kind of “required” in your CV for positions in academia, but argued that even when you do not plan to stay in academia it can be beneficial: it is much easier to apply for non-academic positions from PD than from PhD because you can quit and start in two weeks if needed (depending on where you are)

Cons:

 - 1-year Postdoc→You will have to start applying directly again

Why I Decided to Do a Postdoc? (Or Several ;))

For me it was a combination of different things (also different things for the different stages), and mostly a combination of both academic, but also private reasons:

Why I Decided to Do a Postdoc? (Or Several ;))

For me it was a combination of different things (also different things for the different stages), and mostly a combination of both academic, but also private reasons:

- My first host was someone I really wanted to work with (one of *the* large people in CG, very different style of running his group than my PhD advisor), and it was great
- Didn't hurt that it was NYC

Why I Decided to Do a Postdoc? (Or Several ;))

For me it was a combination of different things (also different things for the different stages), and mostly a combination of both academic, but also private reasons:

- My first host was someone I really wanted to work with (one of *the* large people in CG, very different style of running his group than my PhD advisor), and it was great
- Didn't hurt that it was NYC
- Did the Postdoc part in Germany thereafter, because teaching a course as the sole responsible for the course has various preconditions (PhD, but also intention to write your habilitation, which I had to formally submit written down etc.)

Why I Decided to Do a Postdoc? (Or Several ;))

For me it was a combination of different things (also different things for the different stages), and mostly a combination of both academic, but also private reasons:

- My first host was someone I really wanted to work with (one of *the* large people in CG, very different style of running his group than my PhD advisor), and it was great
- Didn't hurt that it was NYC
- Did the Postdoc part in Germany thereafter, because teaching a course as the sole responsible for the course has various preconditions (PhD, but also intention to write your habilitation, which I had to formally submit written down etc.)
- For Israel, the main motivation was to become fully independent of my PhD supervisor
- Also to try a different research area
- Again, Israel was very interesting for me on the personal level

Why I Decided to Do a Postdoc? (Or Several ;))

For me it was a combination of different things (also different things for the different stages), and mostly a combination of both academic, but also private reasons:

- My first host was someone I really wanted to work with (one of *the* large people in CG, very different style of running his group than my PhD advisor), and it was great
- Didn't hurt that it was NYC
- Did the Postdoc part in Germany thereafter, because teaching a course as the sole responsible for the course has various preconditions (PhD, but also intention to write your habilitation, which I had to formally submit written down etc.)
- For Israel, the main motivation was to become fully independent of my PhD supervisor
- Also to try a different research area
- Again, Israel was very interesting for me on the personal level
- Sweden offered someone from the same area, but the chance to also work more applied
- I had an easier step in because of prior language knowledge
- Seemed to have a well-structured option of a further career

Why I Decided to Do a Postdoc? (Or Several ;))

For me it was a combination of different things (also different things for the different stages), and mostly a combination of both academic, but also private reasons:

- My first host was someone I really wanted to work with (one of *the* large people in CG, very different style of running his group than my PhD advisor), and it was great
- Didn't hurt that it was NYC
- Did the Postdoc part in Germany thereafter, because teaching a course as the sole responsible for the course has various preconditions (PhD, but also intention to write your habilitation, which I had to formally submit written down etc.)
- For Israel, the main motivation was to become fully independent of my PhD supervisor
- Also to try a different research area
- Again, Israel was very interesting for me on the personal level
- Sweden offered someone from the same area, but the chance to also work more applied
- I had an easier step in because of prior language knowledge
- Seemed to have a well-structured option of a further career

For me also:

- General curiosity to live somewhere else
- Learn about other university systems

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

And how to progress after the Postdoc?

09/2015 **Communications and Transport Systems @ ITN:**

09/2015-10/2017: Postdoc

11/2017-03/2020: Assistant professor (biträdande universitetslektor)

04/2020-02/2022: Associate professor (universitetslektor)

03/2022-...: Senior associate professor (biträdande professor)

And how to progress after the Postdoc?

- The Postdoc at LiU was a bit unusual, as it included teaching (in air traffic and air transportation, and scientific writing in case studies in air traffic and logistics)

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

And how to progress after the Postdoc?

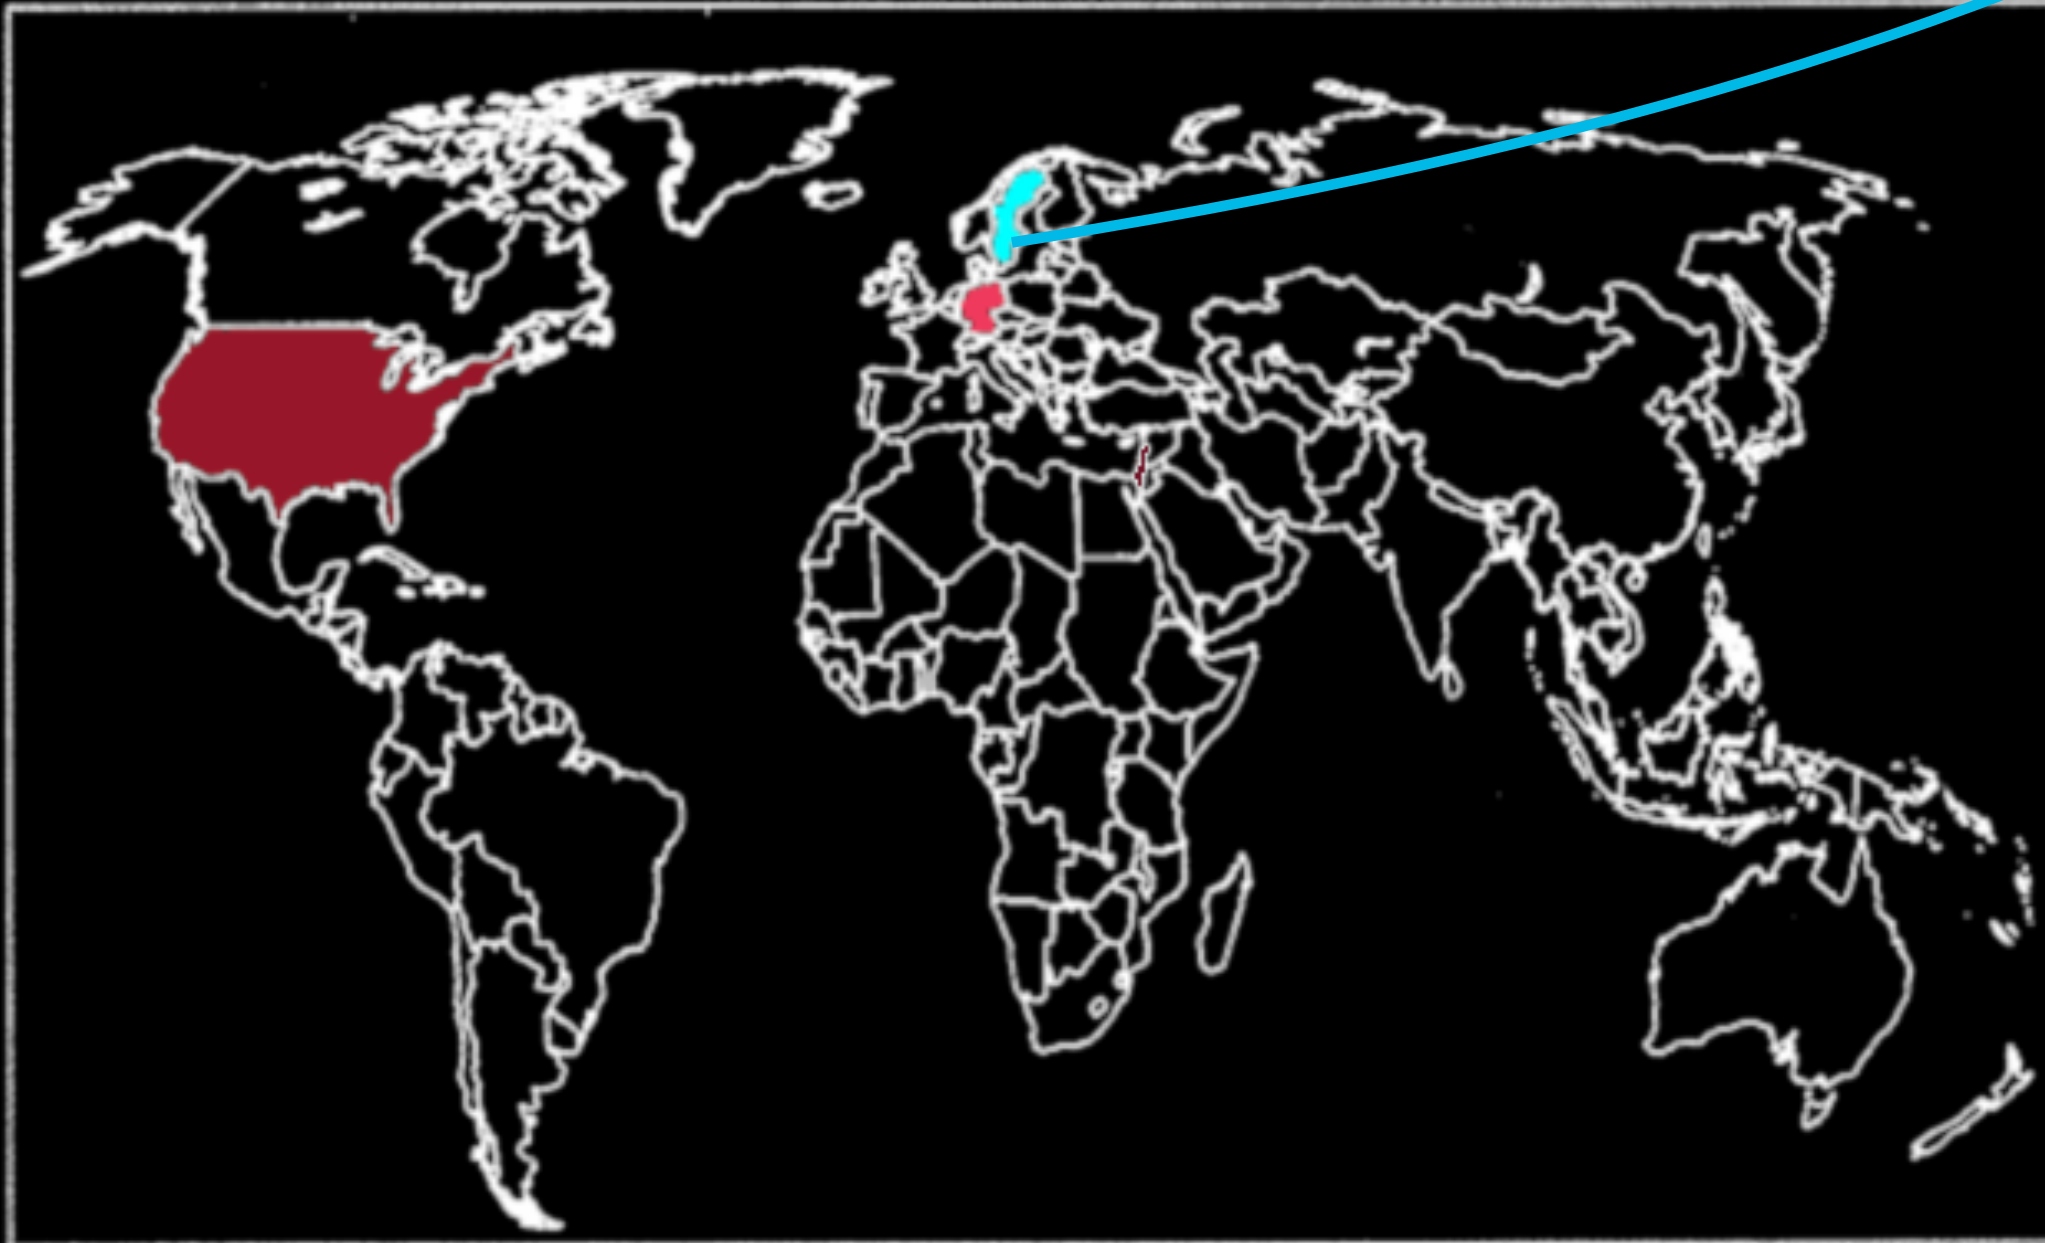

- The Postdoc at LiU was a bit unusual, as it included teaching (in air traffic and air transportation, and scientific writing in case studies in air traffic and logistics)
- Had already taught a PhD course (Design and Analysis of Algorithms Part 1: Mathematical Tools and Network Problems) during my Postdoc

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)

- Started collaborating with various colleagues at KTS, e.g., with the railway group
- Organised a research seminar
- Was offered to stay afterwards, I decided for it:
 - Nice working environment (had experience with a problematic one from before)
 - Wanted to continue with a combination of theoretical and applied research

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

And how to progress after the Postdoc?

- The Postdoc at LiU was a bit unusual, as it included teaching (in air traffic and air transportation, and scientific writing in case studies in air traffic and logistics)
- Had already taught a PhD course (Design and Analysis of Algorithms Part 1: Mathematical Tools and Network Problems) during my Postdoc
- Started collaborating with various colleagues at KTS, e.g., with the railway group
- Organised a research seminar
- Was offered to stay afterwards, I decided for it:
 - Nice working environment (had experience with a problematic one from before)
 - Wanted to continue with a combination of theoretical and applied research
 - Clearly outlined career perspective

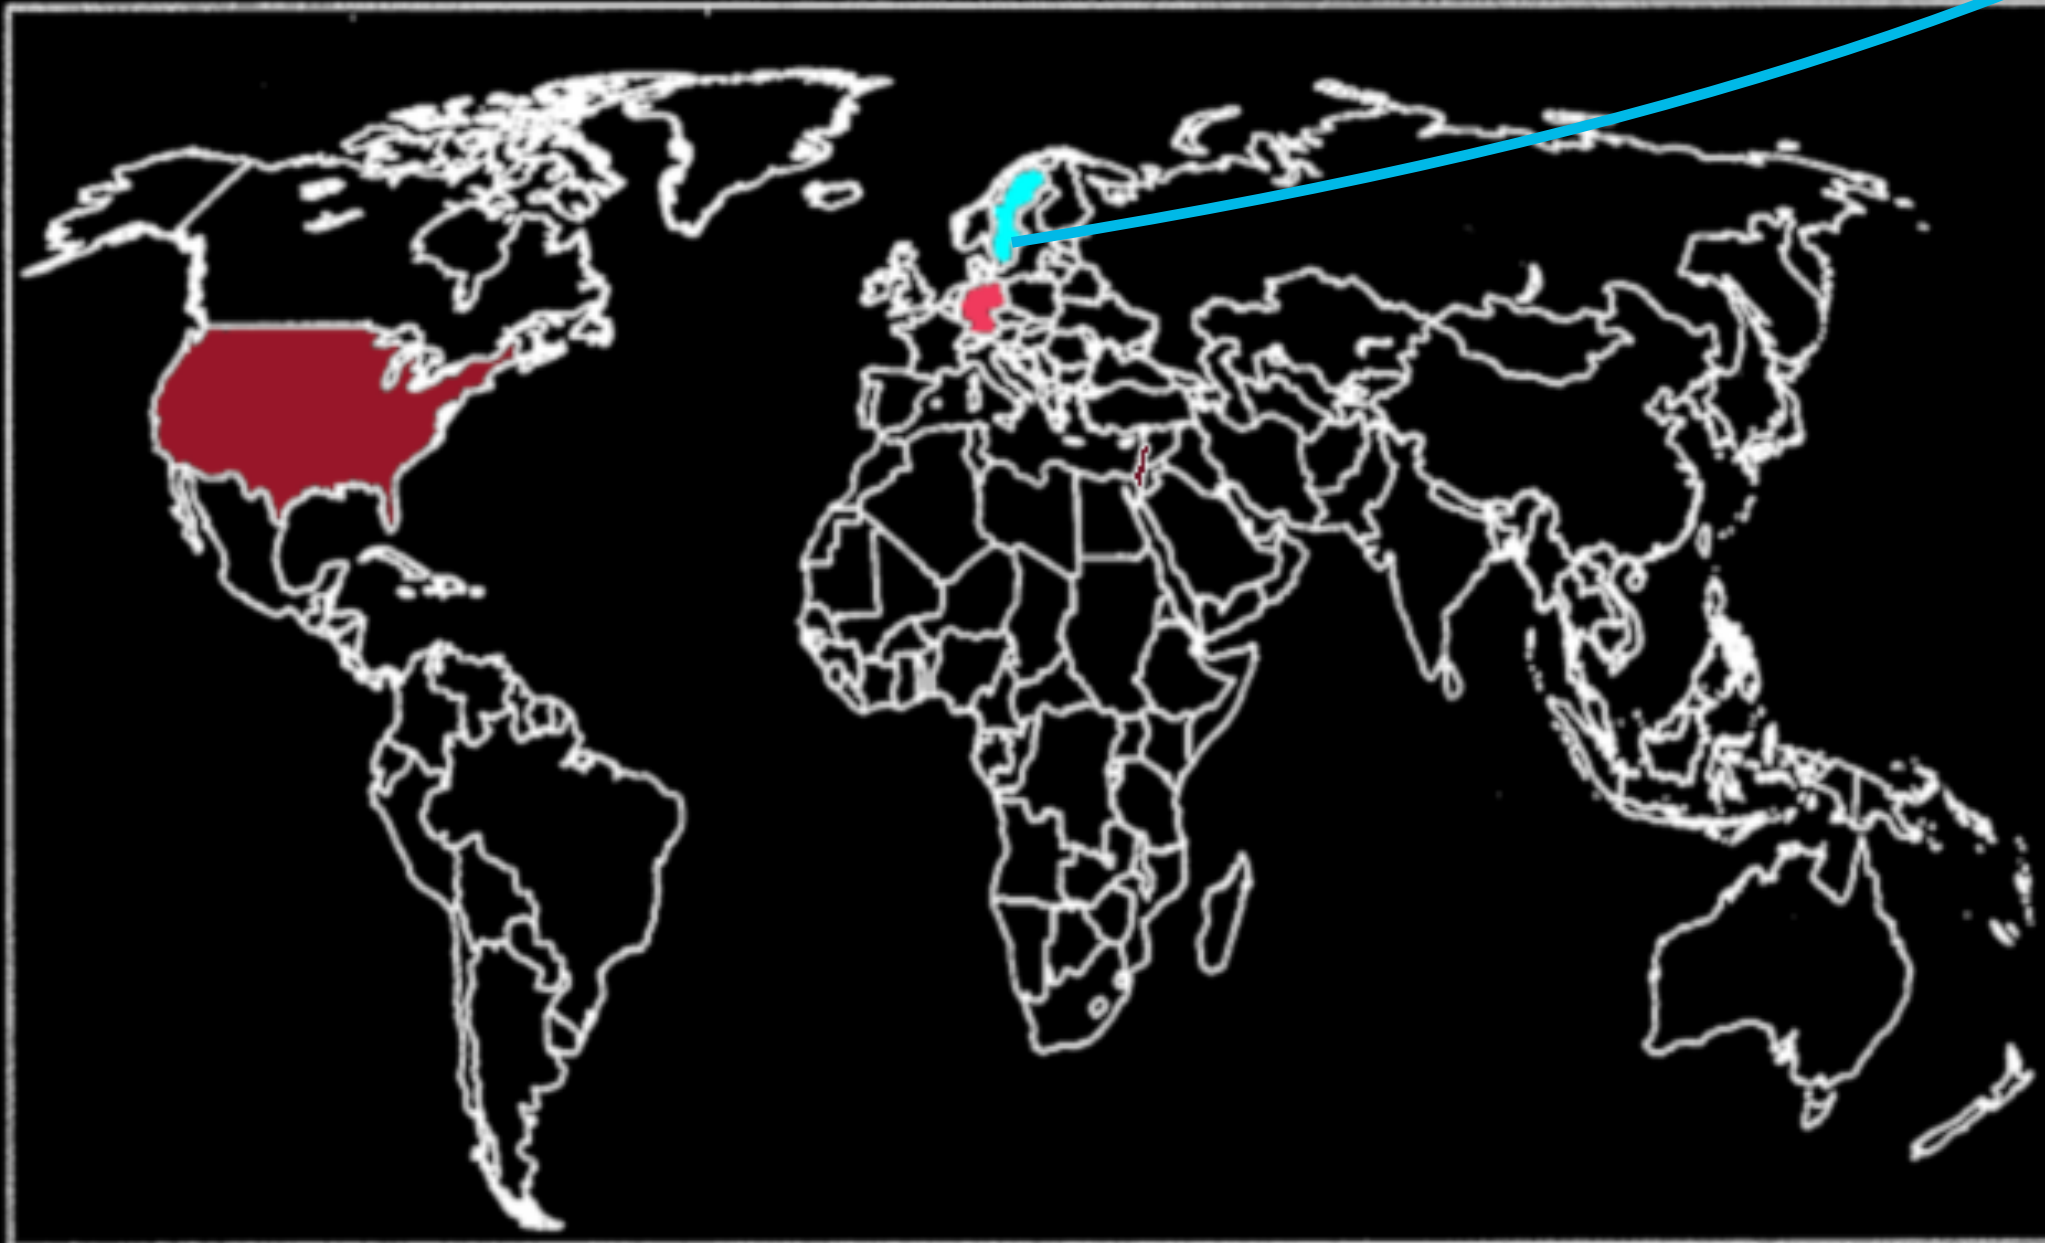

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

And how to progress after the Postdoc?

- The Postdoc at LiU was a bit unusual, as it included teaching (in air traffic and air transportation, and scientific writing in case studies in air traffic and logistics)
- Had already taught a PhD course (Design and Analysis of Algorithms Part 1: Mathematical Tools and Network Problems) during my Postdoc
- Started collaborating with various colleagues at KTS, e.g., with the railway group
- Organised a research seminar
- Was offered to stay afterwards, I decided for it:
 - Nice working environment (had experience with a problematic one from before)
 - Wanted to continue with a combination of theoretical and applied research
 - Clearly outlined career perspective
 - Supportive colleagues during stronger sickness phases, chronic illnesses do not fit well in the academic system in other countries, e.g., in Germany

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

And how to progress after the Postdoc?

 - Clearly outlined career perspective
 - Supportive colleagues during stronger sickness phases, chronic illnesses do not fit well in the academic system in other countries, e.g., in Germany
 - Disadvantages:
 - A bit off from central Europe, so, research visitors a bit more rare than elsewhere
 - Not a large algorithms group (but started working with a guarding expert in Malmö, we are now co-supervising a PhD student with funding from VR), funding easier for applications

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

And how to progress after the Postdoc?—More generally:

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

And how to progress after the Postdoc?—More generally:

- Familiarize yourself with the career ladder in the country you are aiming for, this varies a lot even between European countries

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

And how to progress after the Postdoc?—More generally:

- Familiarize yourself with the career ladder in the country you are aiming for, this varies a lot even between European countries
- If you go for another country: check how your accomplishments from abroad can be counted towards the requirements for career steps

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

And how to progress after the Postdoc?—More generally:

- Familiarize yourself with the career ladder in the country you are aiming for, this varies a lot even between European countries
- If you go for another country: check how your accomplishments from abroad can be counted towards the requirements for career steps
- Do not only decide by content, but also by the working environment, a destructive one can cost a lot of your time

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

And how to progress after the Postdoc?—More generally:

- Familiarize yourself with the career ladder in the country you are aiming for, this varies a lot even between European countries
- If you go for another country: check how your accomplishments from abroad can be counted towards the requirements for career steps
- Do not only decide by content, but also by the working environment, a destructive one can cost a lot of your time
- Have a clear picture of how funding can be obtained and what is required

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

And how to progress after the Postdoc?—More generally:

- Familiarize yourself with the career ladder in the country you are aiming for, this varies a lot even between European countries
- If you go for another country: check how your accomplishments from abroad can be counted towards the requirements for career steps
- Do not only decide by content, but also by the working environment, a destructive one can cost a lot of your time
- Have a clear picture of how funding can be obtained and what is required
- Expanding your research area may take some time and may cost you w.r.t. your primary research area—makes you more versatile, but also navigates you in a bit of a niche

09/2015 **Communications and Transport Systems @ ITN:**
09/2015-10/2017: Postdoc
11/2017-03/2020: Assistant professor (biträdande universitetslektor)
04/2020-02/2022: Associate professor (universitetslektor)
03/2022-...: Senior associate professor (biträdande professor)

And how to progress after the Postdoc?—More generally:

- Familiarize yourself with the career ladder in the country you are aiming for, this varies a lot even between European countries

Keep on building your network—with researchers inside and outside your organization:

- For example, I was accepted into the AMS (American Mathematical Society) Mathematics Research Communities program in Discrete and Computational Geometry, 2012; could apply for some money to continue our research after that
