		13.10., 15-17 lecture by Alan Kinene			
--	--	--	--	--	--

Lecturer (if not noted otherwise): Christiane Schmidt, Spetsen 6212

Lectures by colleagues and some guest lectures will be followed by a small mandatory quiz. You need to pass all but 2 of these quizzes.

Homework#1 needs to be submitted by **September 18, 10:00**

Homework#2 and the correction of homework#1 needs to be submitted by **September 29**

Homework#3 and the correction of homework#2 needs to be submitted by **October 12**

The correction of homework#3 needs to be submitted by **October 29**

- If a homework has been submitted in time, but failed, may possibly be completed, the completion must be submitted at most one week after you received your result.
- If a homework has been submitted in time, but failed and does not fulfill the requirements for completion, you must resubmit the assignment at least two weeks later. In addition, the student needs to submit an additional assignment at the same time.
- A homework that is submitted too late results in an additional assignment, which needs to be submitted at most two weeks after the original submission date. If the original assignment needs to be completed, the completion needs to be submitted by the same date.
- Plagiarism is—as always—not allowed, make sure to produce original content.

If the above requirements are not met for one or several of the homework sets, this results in a final fail for the homework and for the complete course. The student may then participate the next time the course is offered.
